## BLUEWATER 36

*The legendary 355e has been reborn as the all-new Bluewater 36. Designed with the latest advancements in marine technology while preserving the core features Bluewater owners know and love, this next-generation model raises the bar in every way.*

*The 36 combines a powerful deep-vee hull configuration with a spacious flush deck. Our one-piece "Multi-Plex" stringer system has been enhanced with molded storage boxes integrated into the design. The new system provides greater rigidity and includes far more insulation for all of the fish boxes. With a standard 390-gallon fuel capacity (up to 452 gallons available) and rated for 1275 horsepower, the 36 will take you anywhere the fish are as fast and comfortable as you care to go.*

### BLUEWATER 36 SPECS
