

Language Access In The Arab World - Healthcare Industry

Across the Gulf, hospitals serve patients from **200+ nationalities**. Yet **1 in 4 clinical errors stems from language misunderstandings**. EALS enables healthcare systems to deliver safe, compliant, and multilingual care, aligned with DHA, SEHA, MOPH, and Joint Commission standards.

Where Language Access Matters

3 Steps to Language Readiness

Audit patient touchpoints for multilingual risk

Deploy real-time interpretation (phone/video/on-site)

Train staff on cross-cultural and Arabic clinical communication

Establish compliance dashboards for accreditation readiness
