

LDH Blood Test

Patient Information:

Name:	Bernie Dickenson
Date of Birth:	01/15/1975
Gender:	Male
Address:	123 Health St, Medville, CA 90210
Phone Number:	123 Health St, Medville, CA 90210
Email Address:	bernie.dickenson@email.com

Medical History & Related Questions:

Question	Response
Previous diagnoses related to organ dysfunction?	Yes
Any recent physical trauma or injury?	No
History of cancer?	No
Current medications?	Metformin, Lisinopril
Any known allergies?	Penicillin

Tests:

Test Component	Result	Reference Range
LDH Total	320 U/L	140-280 U/L
LDH1		
LDH2		
LDH3		
LDH4		
LDH5		

Findings:

Parameter	Observation	Basis of Finding
LDH Total	High	Above the reference range
LDH Isoenzymes		

Interpretation:

Finding	Implication
Elevated LDH	Possible tissue damage or organ dysfunction. Requires further investigation.

Overall Interpretation:

Based on the findings, Bernie Dickenson's results indicate elevated LDH levels, which could be indicative of possible tissue damage or organ dysfunction. Further diagnostic testing and clinical correlation are recommended for a definitive diagnosis and appropriate management.
