

Title: *Thicky Shell Jellyfish 3*

Dimensions: 440x28x15cm

Medium: Raffia and Seagrass Chord

#### PACKAGING

- Please keep all of the packaging and labels supplied with this work for future transit and the next recipient. Please use blue tape supplied to seal packaging and remove for storing.
- Please ensure the timber pegs wrapped separately and attached to the wrapping are not separated from the packaging to avoid them being lost.

Installation	<p>Two options are possible for installation of this object:</p> <ol style="list-style-type: none"><li>1. When exhibited at the Melbourne Art Fair in February 2025, two wooden pegs were used to support the work. These are supplied, however require screwing into two points in the wall, perhaps not suitable for most members given repairs would be needed after the work moves on in 6 months.</li><li>2. The simpler option is to hang on a hook on the wall by attaching to the small brass ring sewn onto the rear. Note: the work is intended to hang on an angle. The positioning of the ring is at the top on one edge ensures the angle is as per the artist's intention.</li></ol> <p>Note: The 'basket' is stuffed with paper to create the body shape. You may wish to add to this if the shape needs further filling out.</p>
Transit	This object can be wrapped in Tyvek or bubble wrap
Light	<b>Please install in an area with no direct and limited ambient light, raffia and seagrass will become very brittle with too much light exposure. The natural dyes are not very stable and will fade very quickly if exposed to light.</b>
Temperature Humidity	Fluctuations in temperature and humidity will cause the fibre to swell and can result in cracking. High humidity will attract insects.
Structural Fragility	Fibre is prone to breakage as it becomes brittle.
Maintenance	Regular dusting with a soft brush.
