Experience

Well Bussiness Promotion

Web Developer

11/2022 – 1/2024

- Developed responsive and dynamic web applications and websites with React.js, WordPress, and other CMS platforms, prioritizing performance and user experience
- Designed and redesigned websites and e-commerce solutions implementing style guides and components that made 15% conversion rate boost and also increase in website traffic by 20%
- Managed websites and applications using AWS and Runcloud, working with hosing environments and setup third parties, which improved my organizational and adaptibility skills

Comtrade Group

Intern

5/2022 – 9/2022

- Worked on visual interfaces, wireframes, and streamlining app workflows for optimal user experience during my internship for two applications using Microsoft Power.
- Built the logic for a storage management app and also worked as team leader in my group of interns
