

## Key Fob Usage

To access Edinburgh Park, the user is required to open their car window and the fob to be physically touched to the area of the panel, located at the bottom, under the 'bell' button (indicated below in image).

If you experience any difficulties, please use the intercom located at each barrier.

As per the T&C's, without exception, please be advised that your fob must be used each and every time you enter or exit the barrier, in order for the barrier to open, or remain open, to allow your vehicle to pass safely.
