Appsilon | ERA SCIENCES Evolved DI Solutions

Design Once, Validate Once, Go Live Sooner

SCE Modernization Discovery: Get the target design, implementation recommendations and a roadmap to a validated, modern and scalable SCE that takes your teams from data to submission faster.

1–3 days

on-site, scoped on the call

About 2–4 weeks

to the final design, recommendations and roadmap

Fixed price

set once the format is scoped

Scan to See the Full Offer and Book a Scoping Call

30 minutes with our SCE team. We recommend the right discovery format for your project and deadline.

Appsilon | ERA SCIENCES Evolved DI Solutions

Business First, Design at the Core

The full three-day format. Shorter formats are scoped on the call.

BEFORE

Pre-Work

We review your documentation and systems, and agree who joins each session

DAY 1

Align on the Business

Current and future processes, then user requirements, before any tool is chosen

DAY 2 · CORE

Design the Solution

Architecture, tools, integration and the path to production, with compliance captured alongside

DAY 3

Validate and Sign Off

A qualification strategy QA can commit to, and a roadmap signed off before we leave

AFTER · 2–4 WEEKS

Follow-Up

Final design, recommendations and roadmap, walked through with your team

A Signed-Off Blueprint for the Whole Build

01 Target Technical Design
Compute, storage, execution and environment promotion, integrated with the systems you run and plan

02 Implementation Recommendations
Tools and vendors with trade-offs, build approach, first-release scope, and a team and effort estimate

03 Compliance-Tagged Requirements
User and technical requirements in plain language, each marked for GxP relevance as it is captured

04 Validation Strategy
A risk-based approach for accuracy, reproducibility and traceability that holds up at inspection

05 Phased Roadmap
What must be ready by your deadline, what follows, and written scope boundaries for both

06 Decision Pack
A go/no-go recommendation your leadership can sign off

Beyond the Workshop: Validation and GxP Consulting

R Package Validation
Axon.R: GxP-aligned, audit-ready package validation

Shiny App Validation
shiny.val.tools: open-source tooling that produces per-feature validation evidence

Qualified Environments
R and Python environments designed, built, and qualified on your cloud

Validation Support
Evidence, protocols, and documentation per release, with ERA Sciences

Book a scoping call. 30 minutes with our SCE team to choose the right discovery format.
