

# **An SCRM Roadmap for Supply Chain Resilience**

Traditional supply chain risk approaches focus on short-term fixes without addressing the root causes of cost, compliance, and resilience challenges.

Avetta's supply chain risk management platform delivers measurable results across short, medium, and long terms. It helps you reduce costs, protect margins, and keep revenue flowing in challenging market conditions.

#### **Short-Term Actions**

Immediate cost reduction and revenue protection

Benefits

#### **Reduce Costs**

- Offload insurance verification to save up to 3.3% of the wage bill and reduce liability exposure
- Automate supplier qualification to cut costs and accelerate onboarding by 30%
- · Monitor supplier performance to catch underperformers before they impact timelines and margins

#### **Protect Revenue**

- Prevent incidents to avoid \$43,000 injury costs and costly project delays
- Establish compliance monitoring to stop fines exceeding \$16,000 per violation
- · Assess small supplier risks, addressing 27% of non-construction and 44% of construction fatalities

#### **Boost Margins**

- · Consolidate supplier spend to capture missed savings through better visibility
- · Eliminate duplicate processes across sites to reduce operational overhead
- · Digitize document workflows to reduce administrative effort and improve data accuracy

# **Mid-Term Initiatives**

Operational transformation and competitive advantage

#### **Benefits**

(6-18 Months)

### **Optimize Supply Chain**

- Extend visibility of Tier 2 and 3 suppliers, where 32% of compliance failures occur
- Deploy predictive risk scoring to cut supplier incidents by 54% and prevent project delays
- · Leverage performance data, leading indicators, and predictive analytics to spot risks and guide strategic planning

### **Increase Efficiency**

- · Integrate enterprise systems to unify procurement, safety, and finance for
- real-time decisions · Enable mobile field checks to instantly verify supplier status and prevent stoppages
- Automate compliance tracking to spot supplier issues early and prevent costly

# **Refine Cost Structure**

- · Scale qualification automation to reduce staffing needs and reallocate resources to higher-value work
- Accelerate supplier onboarding to minimize cash flow delays and speed project delivery
- Build strategic partnerships to drive innovation and long-term cost reduction

# Long-Term Strategic Objectives

Market leadership and sustained competitive advantage

# Benefits

# **Build Resilience**

- Map the supply chain end-to-end to expose weak points and prevent stoppages that consume 45% of annual profits
- · Develop scenario planning to maintain continuity during market shocks and disruptions • Build agile sourcing networks to pivot quickly on cost, capacity, and risk factors

# **Enable Growth**

- · Leverage prequalified suppliers to speed market entry and project scaling
- · Build innovation partnerships to reduce costs and improve processes collaboratively · Develop competitive intelligence to stay ahead on pricing and market opportunities

# **Master the Market**

- Establish industry leadership in supply chain risk management excellence
- Drive operational standards that shape best practices and influence
- · Build ecosystem partnerships to expand capabilities and strengthen market reach
