

# MBA in Artificial Intelligence (Advanced Entry)

Anglia Ruskin University

The MBA in Artificial Intelligence (Advanced Entry) is designed for learners who have already completed a relevant postgraduate qualification and wish to progress to a full master's degree in a shorter time frame. The programme combines advanced business management principles with the strategic application of artificial intelligence in modern organisations. Aligned with current industry trends and technological innovation, the course focuses on AI-driven decision-making, digital transformation, data analytics, strategic leadership, and business innovation. Graduates will emerge as forward-thinking, highly skilled professionals, well prepared to lead organisations through technological advancement and digital change.
