

## SUSPENDED WIRE

### Specifications & Installation Manual

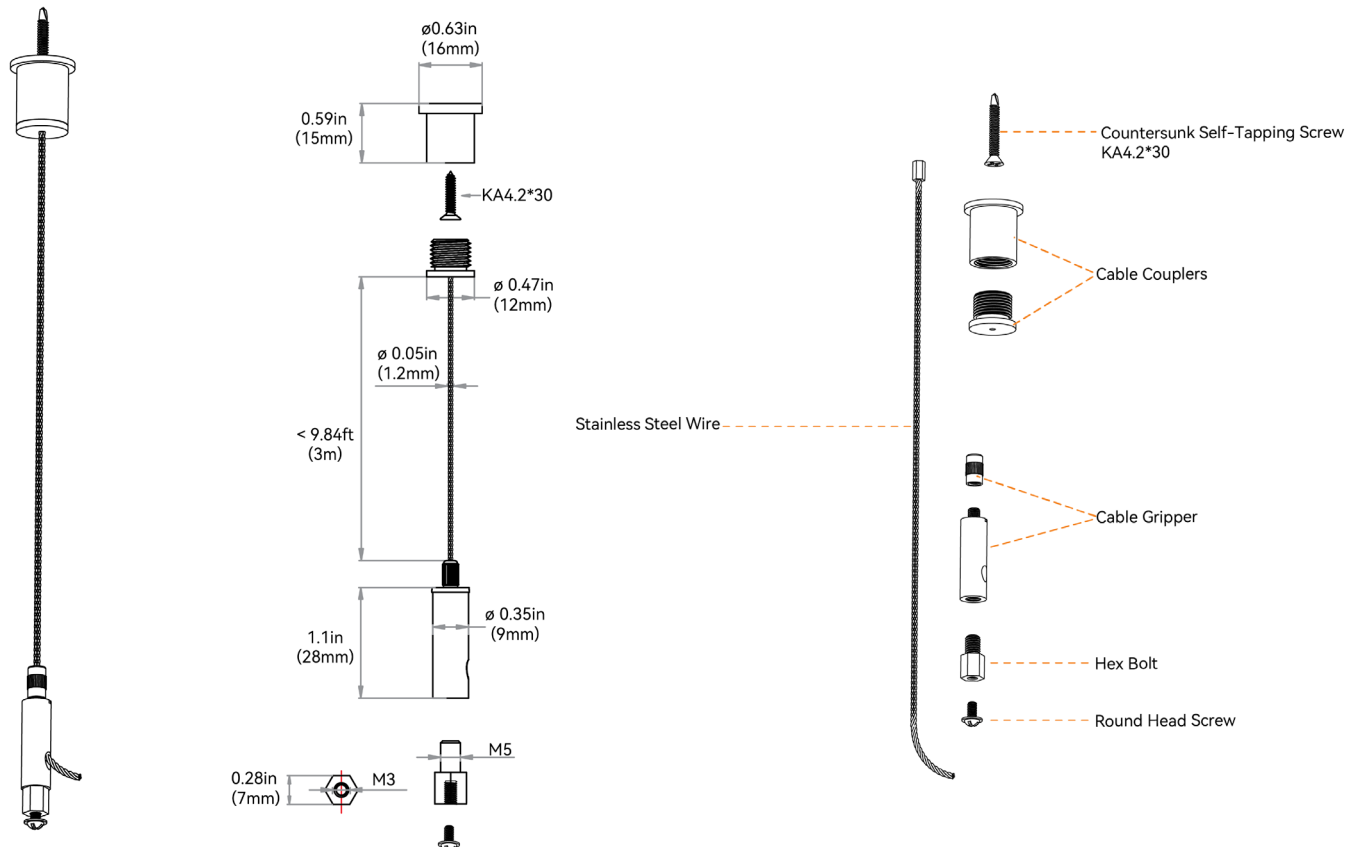

Mounting Suspended Wire Kit is a refined, versatile accessory crafted specifically for use with the Aluminum Silicone Grip Profile series. Designed for elegant ceiling-mounted installations, this wire kit offers a clean, minimalist suspension solution that enhances both form and function. Ideal for creating floating lighting effects, the kit ensures secure support while allowing the fixture to hang gracefully from the ceiling. Perfect for modern architectural and commercial spaces, the Mounting Suspended Wire Kit adds a sophisticated touch to any overhead lighting design. Available for Contour, S160, S270, Wave Mini and Wave.

# SUSPENDED WIRE

## Installation Manual

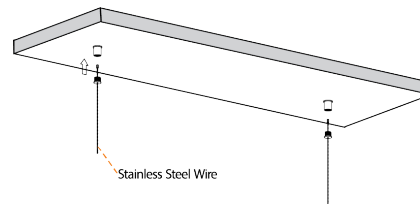

### STEP 1:

Mount the attachment of cable couplers to the ceiling with sufficient load-carrying capacity and tighten them with screws.

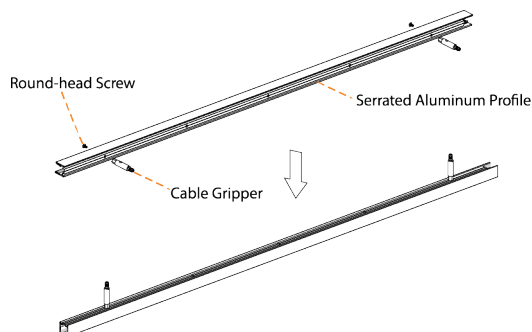

### STEP 2:

Thread the stainless steel wire through the male screw of cable couplers and then connect to the mounted attachment of cable couplers.

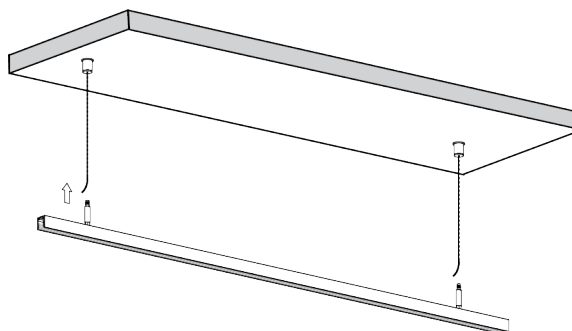

### STEP 3:

Insert the screw into the serrated aluminum profile to lock with the cable gripper sliding from the bottom slot of serrated aluminum profile.

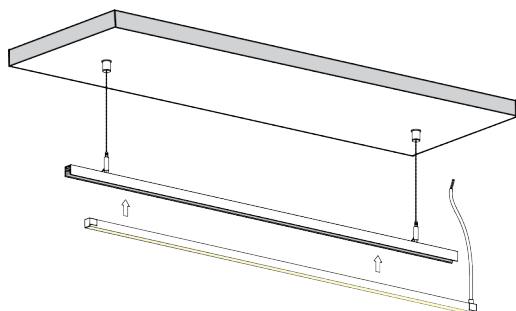

### STEP 4:

Thread the stainless steel wire through the bushing of cable gripper.

### STEP 5:

Fix the light into the aluminum profile.

### STEP 6:

Adjust the length of stainless steel wires to the desired height. Tighten the coupling nut and cut or roll up the excess stainless steel wires after the power-on test.
