

Cavelo for MSPs & MSSPs

The Turnkey DSPM Platform for Scalable, Data-First Security Services

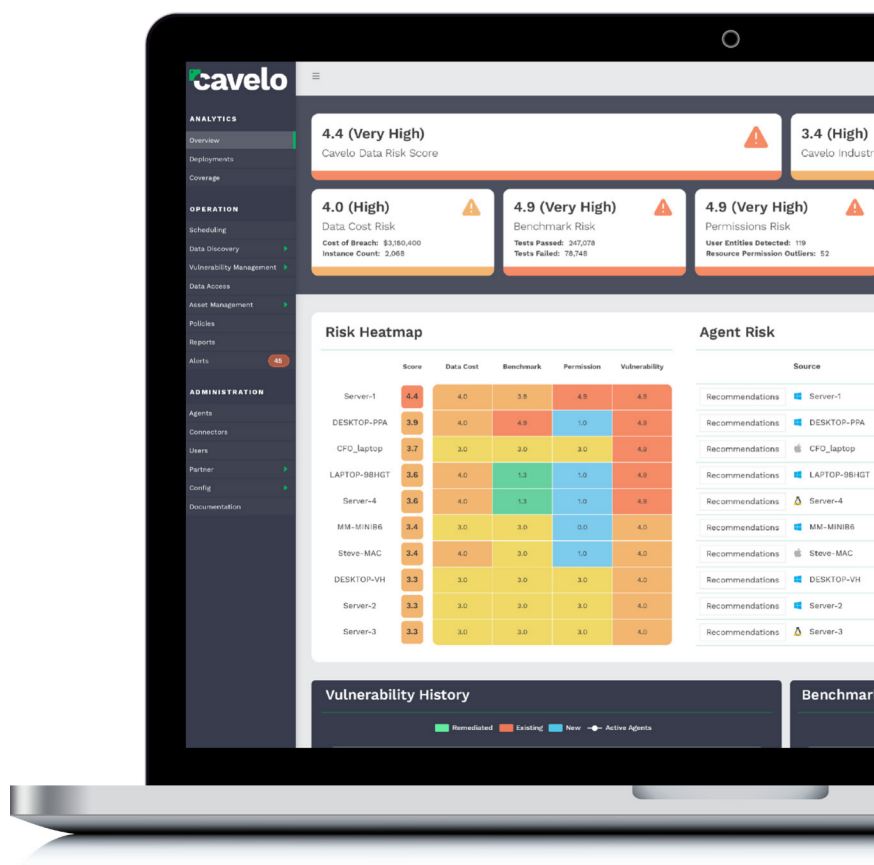

The MSP & MSSP Challenge

Service providers today face growing pressure to streamline their security stacks by cutting down on tool sprawl and integration headaches, all while keeping costs in check and driving better results. They're expected to show clients real, business-aligned value, shine a light on blind spots like sensitive data and shadow IT, and deliver compliance-ready services—without piling more work onto already busy teams.

Why DSPM?

Data Security Posture Management (DSPM) helps service providers:

- ✓ Automatically discover and classify sensitive data across all environments
- ✓ Prioritize exposures based on data value and business impact
- ✓ Map risks to compliance frameworks (NIST, SOC2, CMMC, etc.)
- ✓ Reduce operational overhead with multi-tenant, automated visibility

Introducing Cavelo

Cavelo was built by a former service provider, for service providers.

Its unified DSPM and ASM platform is designed to help MSPs and MSSPs reduce complexity, increase visibility, and deliver high-impact, data-centric security services at scale.

Whether you're launching DSPM-as-a-Service or integrating DSPM into your broader offering, Cavelo provides the visibility, context, and scale you need to lead with data-first security.

Core Capabilities

Data Discovery & Classification

Scan Windows, Mac, Linux, and cloud sources for sensitive data

File Permissions & Access Auditing

See who (or what) has access and track risky activity

Vulnerability Management

Identify and prioritize exposures tied to sensitive data

Configuration Management

Benchmark systems against CIS/Microsoft best practices

Asset Discovery

Automatically inventory all devices to eliminate blind spots

Why Service Providers Choose Cavelo

- ✓ Multi-tenant management for all clients in one platform
- ✓ Fast deployment (get started in hours, not weeks)
- ✓ Executive-ready reports to prove service value and reduce churn
- ✓ Mid-market friendly pricing with strong margins
- ✓ Integrates with your existing RMM/PSA/vCISO workflows & tech stack

Cavelo vs. Legacy Tools

		Traditional Data Security Platforms	Governance Platforms	Exposure Management Platforms
DSPM Alignment	✔ Full data risk visibility	⚠ Filer/server only	⚠ Access only	✗ Infra-only
Deployment	SaaS-first	On-prem/Hybrid	Hybrid	Cloud/Infra
Multi-Tenant MSSP Use	✔ Yes	✗ No	✗ No	⚠ Infra-only
Time-to-value	Hours–Days	Weeks–Months	Weeks	Variable

"The Cavelo platform provides an excellent suite of data discovery, vulnerability, and configuration management tools to perform risk management of assets."
