

## Meet Cora.

*And turn security data into action—  
instantly.*

Cora from Cavelo is an on-demand AI security analyst that transforms complex security data into clear, actionable insights. Built directly into the Cavelo platform, Cora helps MSPs and MSSPs move from identifying risk to resolving it faster.

Security teams aren't struggling with a lack of data. They're overwhelmed by it. Cora combines AI-driven intelligence with the context already inside Cavelo, helping teams discover, understand and act on risk faster. Cora acts as an always-on security analyst that helps your team:

Instantly  
understand risk

Prioritize what  
matters most

Take action without digging  
through dashboards

Communicate value  
clearly to customers

## Built for Every Role Across Your Business

Role	What They Need	How Cora Helps	Business Value
<b>MSP / MSSP Owners</b>	Visibility and ROI	“Which customers are most at risk?” “Where are we missing SLAs?”	Stronger operations and clearer business insight
<b>Security Consultants</b>	Narrative and strategy	“What’s the risk story here?” “How do we communicate this to the client?”	Better storytelling and stronger advisory services
<b>Senior Engineers</b>	Insight and optimization	“Where is risk concentrated?” “Which products are most vulnerable?”	Guidance on what actions need to be prioritized to best secure client environments. Better decisions and deeper analysis
<b>Level 1–2 Techs</b>	Speed and clarityinsight	“What should I fix first?” “Which hosts are affected?”	Faster task execution with less manual digging

# Transform Security Data into Faster Outcomes

## Revenue-Driving Workflows

Turn insights into billable services and stronger customer relationships.

- Instantly generate customer-ready reports
- Identify high-risk environments that require immediate engagement
- Surface upsell opportunities tied to exposure and remediation needs
- Correlate technical risk with business outcomes

***Turn every insight into an opportunity to deliver and demonstrate value.***

## Time-Saving Automation

Eliminate manual investigation, filtering and reporting.

- Replace hours of analysis with instant answers
- Remove dependency on manual filtering and complex dashboards
- Batch remediation tasks into tailored action plans
- Empower junior operators with faster access to actionable intelligence
- Streamline remediation workflows and reduce operational noise

***Do in seconds what used to take hours.***

## Customer Value Accelerators

Communicate risk clearly and reinforce your role as a trusted advisor.

- Translate technical findings into business insights
- Deliver consolidated, customer-ready reports
- Answer customer questions instantly with contextual intelligence
- Prioritize the vulnerabilities that matter most
- Drive stronger customer conversations around risk and remediation

***Make your value visible to every customer.***

## Why Cora?

Cora helps MSPs and MSSPs turn security data into action. Instantly uncover exposure, prioritize remediation and communicate value clearly without digging through siloed tools and dashboards. From identifying high-risk environments to generating customer-ready reports, Cora helps teams work faster, smarter and more strategically. Book a personalized demo to see how Cora accelerates remediation, improves efficiency and strengthens customer outcomes.
