

Powerful performance for IT teams

Powering IT productivity with Computacenter services and Microsoft Surface devices

IT and security teams need devices that deliver high performance, reliability and robust security. Their work often involves multitasking across admin consoles, scripting environments and remote tools, which requires fast processors, ample memory and seamless connectivity. Devices need to support secure access, hardware-based encryption and advanced authentication methods, plus offer compatibility with development and automation tools, along with strong integration into enterprise environments. For mobile or hybrid IT teams, durability, battery life and remote manageability are also key requirements.

Microsoft Surface Copilot+ PCs support IT professionals work, from CIO and CISO, to IT manager, IT security manager and IT admins.

Why Surface fits

Microsoft Surface Copilot+ PC devices support the way IT professionals work, combining powerful performance, robust security and seamless integration with the Microsoft ecosystem. Microsoft Surface Copilot+ PCs helps IT teams to troubleshoot, build and innovate with speed. Instant-on functionality, multitasking capabilities,

and AI-powered Copilot features streamline complex workflows, while enterprise-grade security ensures sensitive tasks stay protected. Optimised for Windows 11 and Microsoft 365, Microsoft Surface devices help IT teams stay productive and focus on high-value tasks.

Why work with Computacenter

As a Microsoft Surface Platinum Partner and Authorised service provider, Computacenter has the expertise and proven track record in workplace transformation to help IT teams get the most from their devices. From device selection and procurement to deployment, support and optimisation, Computacenter helps IT teams unlock the full value of Microsoft Surface Copilot+ PCs. Our services reduce risk, accelerate time to value and keep devices in the field with minimal downtime. With scalable support and lifecycle management, we help IT teams deploy, manage and innovate with confidence.

Benefits of working with Computacenter and Microsoft Surface devices in IT

Maximise efficiency and productivity with accelerated deployments, reduced downtime, streamlined IT workflows, instant-on functionality and Copilot-powered automation.

Enhance security with on-device AI so data never leaves the devices, plus enterprise-grade protection from chip to cloud.

Increase flexibility and scalability to support diverse IT environments and user needs through lifecycle services, remote support and seamless integration with existing tools.

Get future-ready with AI-enabled devices and expert support.

Ensure your IT team is future-ready with Computacenter and Microsoft Surface
