

Remote and field-based workers stay productive, connected and secure

Optimise productivity for remote and field-based employees with Computacenter services and Microsoft Surface devices.

Employees who spend most of their time working from home or other remote sites need mobile, durable and high-performing devices that keep them connected and productive in any environment. They require devices with long battery life, secure access to data and compatibility with cloud-based tools, while offering flexibility and offline functionality. Their devices must also be lightweight yet rugged enough for travel or demanding environments in the field. For IT teams and centralised management, strong security is essential to protect data and support users outside of the corporate network.

Microsoft Surface devices help boost productivity for remote workers, from field-based sales representatives and field engineers/technicians to healthcare workers, remote developers, marketing professionals, project managers and customer service agents.

Why Microsoft Surface fits

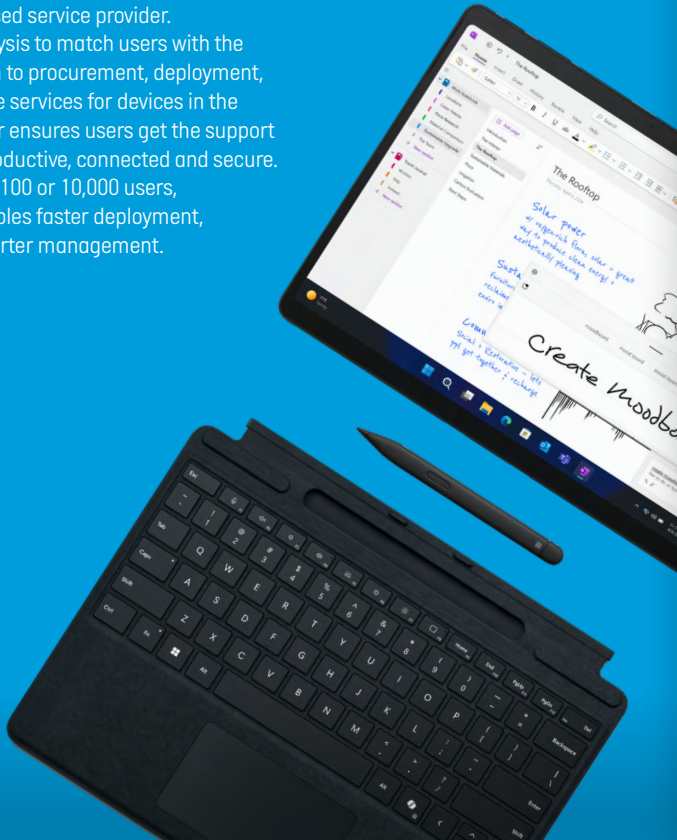

Microsoft Surface Copilot+ PCs are purpose-built for modern, mobile work. With lightweight, convertible designs, long battery life and optional LTE/5G, they keep remote and field workers connected anywhere. Microsoft Surface devices offer touchscreens, digital inking and instant-on access for ease of use, while enterprise-grade security protects sensitive data,

making them ideal for work on the go. Integration with Microsoft 365 and Copilot capabilities boost productivity through AI-powered features like smart summarisation and task automation. Seamless device management, rugged accessories and chip- to-cloud protection ensure a secure, intuitive experience for today's distributed workforce.

How Computacenter keeps your remote teams productive

Computacenter is a Microsoft Surface Platinum Partner and Authorised service provider. From workstyle analysis to match users with the right device, through to procurement, deployment, adoption and remote services for devices in the field, Computacenter ensures users get the support they need to stay productive, connected and secure. Whether supporting 100 or 10,000 users, Computacenter enables faster deployment, lower costs and smarter management.

Benefits of working with Computacenter and Surface devices for field and remote workers

	Keep users connected and productive anywhere with long battery life, Microsoft 365 integration, and on-device AI tools that work even when a device isn't online.
	Boost user experiences with lightweight, rugged devices designed for mobile use.
	Strengthen security with built-in protection and fewer incidents, as shown by IDC ¹ .
	Simplify management with centralised control and remote support.
	Deploy quickly and at scale with Computacenter's expert services for distributed teams.
