

Maximise productivity for Training and HR teams

Empower HR and training teams with Microsoft Surface devices and Computacenter services

To support HR and training effectively, organisations need reliable, high-performing devices that enable hybrid work, rapid onboarding, personalised learning and secure data handling. AI capabilities can help automate tasks, while trainers benefit from tools that support multimedia, collaboration and accessibility. Technology must perform consistently, especially during interviews or training. For IT teams, devices should be easy to manage and secure, even with shared use, and integrate seamlessly with existing enterprise systems.

Supporting inclusivity for hybrid workers, Microsoft Surface devices meet the needs of your HR managers and executives, and training specialists.

Why Microsoft Surface fits

Microsoft Surface Copilot+ PC devices deliver powerful on-device AI for real-time assistance, from generating onboarding materials to summarising training sessions. Lightweight, high-performance form factors enable mobility across remote and in-office settings, while enterprise-grade security safeguards sensitive HR data. Microsoft Surface devices also offer built-in tools for accessibility and collaboration that support inclusivity, such as touch, pen input, voice commands, live captions and translations. With seamless Microsoft 365

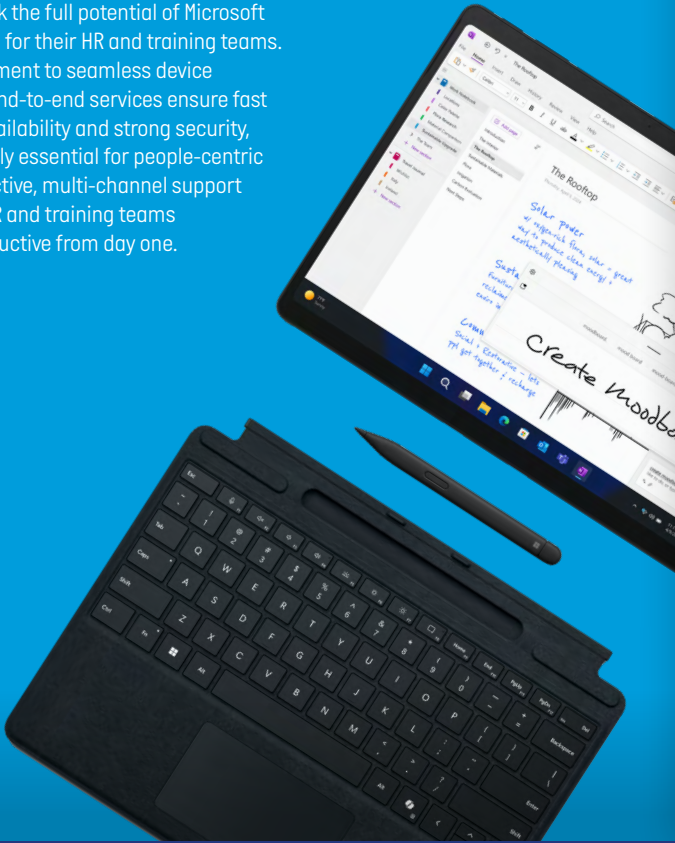

integration and centralised device management, Microsoft Surface devices meet the evolving needs of HR and training teams while future-proofing investments in AI-driven workforce enablement.

Combining the benefits of a desktop and laptop, with the ability to run all your business applications and integrate seamlessly with the existing Windows estate, Microsoft Surface is the only device your users need.

Why work with Computacenter

As a Microsoft Surface Platinum Partner and Authorised service provider, Computacenter helps organisations unlock the full potential of Microsoft Surface Copilot+ PCs for their HR and training teams. From secure deployment to seamless device management, our end-to-end services ensure fast onboarding, high availability and strong security, which are particularly essential for people-centric roles. With our proactive, multi-channel support services, we keep HR and training teams connected and productive from day one.

Benefits of working with Computacenter and Microsoft Surface devices in IT

Deliver exceptional user experiences with on-device, AI-powered workflows.

Safeguard efficiency and productivity with rapid deployment and onboarding, proactive day-to-day device management and responsive user support.

Enhance accessibility and inclusivity with a range of inputs including touch, pen, voice and live captions.

Maximise security and data privacy with inbuilt data protection and compliance tools.

Simplify collaboration with seamless Microsoft 365 integration and real-time communication features.

Optimised devices for HR and training teams
