

THE CULTURE RISK REPORT™

Do You Know Where Your Culture Is at Risk?
Find Out Before It Costs You Talent, Time, and Impact.

Why Culture Risk Matters

- **Unclear communication leads to confusion**
70% of workers waste up to a full day each week due to poor communication.
- **Poor change management leads to resistance**
Only 34% of change initiatives succeed.
- **Neglected connection leads to conflict**
Leaders spend up to 40% of their time dealing with interpersonal tensions.

If you can't see the risks, you can't fix them.

- You will lose top talent.
- You will keep experiencing the same problems.
- You will carry all the weight.

The Culture Risk Report™ pinpoints your team's top cultural risks and most pressing personnel issues so you can turn the tensions of growth into a competitive advantage.

How It Works:

1. **Measure:** Each team member completes a 4-question, scientifically validated assessment (15 min).
2. **Report:** SightShift compiles your customized Culture Risk Report™ (1 week).
3. **Spotlight:** Meet with SightShift for expert insights and a practical action plan (2-hour session).
