

With SILKRO,

all you need to do is choose the treatment plan that suits your specific needs.

Dealing with a range of skin issues like **scars, acne, spots, loose skin, and more**

Safe procedure with **low downtime and fast recovery**

Customized treatment that precisely **targets specific skin areas**

What the Patients Say

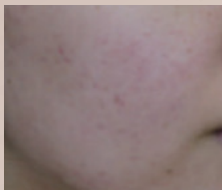

"SILKRO RF microneedling was a game-changer for me in addressing my acne scars. The procedure was relatively painless, with minimal downtime. Over time, my skin improved significantly, and my acne scars became less noticeable. The results were exactly what I wanted."

- Daniel, 28 y.o.

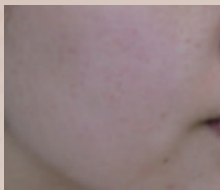

"SILKRO RF microneedling has transformed my skin. In the weeks following the treatment, my skin felt tighter and smoother, and there was a noticeable improvement in fine lines and complexion. It looked much brighter and healthier."

- Emilia, 36 y.o

Total RF Microneedling Solution

- ✓ Resurfacing
- ✓ Tightening
- ✓ Toning
- ✓ Revitalizing
- ✓ Rejuvenating

“

Treating your scars, lines, spots, all those little irregularities gently is the perfect way to attain silk skin.”

SILKRO is a comprehensive Radiofrequency (RF) Microneedling skin treatment system that allows for achieving results such as skin tightening, improved texture, and a reduction in the appearance of scars, wrinkles, and fine lines.

Skin Texture & Density Improvement

Why SILKRO?

SILKRO relies on the comprehensive skincare approach: it provides different types of handpieces to combine several treatment techniques and achieve desired results.

RF Microneedling (Bipolar RF):

improving skin laxity & skin texture

RF Needle (Monopolar RF):

targeted treatment of acne spots & spider veins

RF Circle (Monopolar RF):

deep bulk heating for general skin rejuvenation

How It Works

The controlled micro-injuries from microneedling trigger the skin's natural regenerative processes, while the RF energy heats the deeper layers, promoting collagen and elastin production.

The procedure can be customized to address specific skin concerns through adjustable needle depth and energy settings.

Q

When will I see the effects?

A. You may notice some immediate improvements, such as a slight tightening effect and a subtle glow, soon after the treatment. The most significant and lasting effects become more noticeable several weeks to a few months later, as your body's natural collagen production increases. The full benefits may continue to develop over the course of several months. Individual results can vary depending on a number of factors.

Q

Is there downtime?

A. RF microneedling is considered a minimally invasive treatment, but you may need to rest for a couple of hours immediately after the procedure to allow your skin to close in the treated areas. Over the first one to two weeks following the procedure, you may experience some subtle redness, swelling, and mild discomfort, which is a normal part of the healing process. These effects should gradually subside during this time.

Q

Is it painful?

A. Depending on the type of handpiece used, you may experience mild discomfort. If you're concerned about the level of discomfort during the procedure, don't hesitate to ask your doctor to apply numbing cream beforehand.
