CUSTOMIZED CARE WITH TRIPLE ENERGY

1 Microjet

Fast speed up to 580m/s!
Minimal pain with 180µm
micro-diameter!
Uniform and safe application
for the skin!

2 Electroporation

Microcurrent stimulation
temporarily opens cell
membranes, maximizing
absorption by delivering active
ingredients deep into cells!

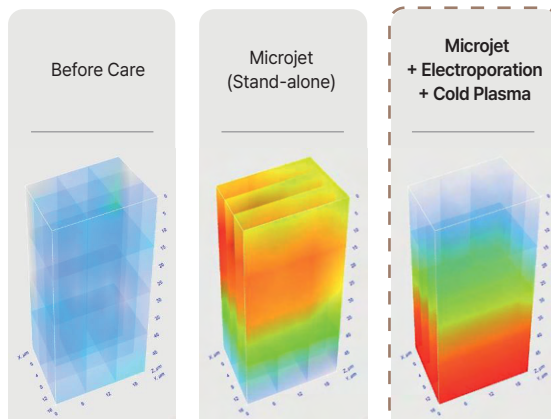

3 Cold Plasma

Converts airborne oxygen into
negative ions to promote
sterilization and skin absorption!
Customized scalp care with
2 dedicated tips!

4.7X DEEPER ABSORPTION* BREAKING THE LIMITS OF SKIN ABSORPTION

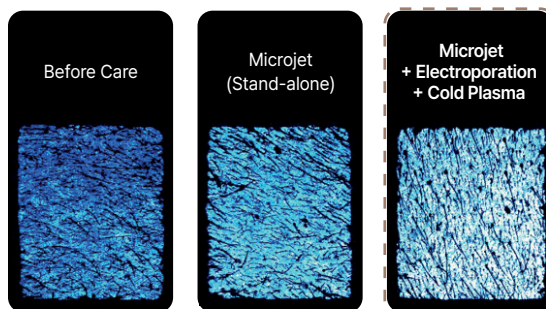

*The figures above are based on human application test results comparing before and after use, using Microjet, Electroporation (Microcurrent), and Cold Plasma combined.
*May 14-15, 2025 / 20 Female Subjects / Human Clinical Trial Center / Human Application Test Results

Low Absorption ————— High Absorption

* Skin absorption test results show that colors located near the bottom or closer to red indicate higher absorption efficacy.

2.3X IMPROVEMENT IN SURFACE SKIN HYDRATION

Low Moisture ————— High Moisture

* Moisture improvement evaluation results show that brighter colors indicate higher skin moisture levels.

MAXIMIZE COSMETIC ABSORPTION WITHOUT PAIN*

*Significant skin improvement was observed across all skin types, including dry, oily, and combination skin, with no adverse reactions reported.

*May 14-15, 2025 / 20 Female Subjects / Human Clinical Trial Center / Human Application Test Results

Pain-free skin treatment using the
Microjet technology!

No worries about swelling or redness,
even on thin and sensitive areas!

Convenient treatment anytime
with zero downtime!
