

# **rare Scholarship Application**

Version updated: January 2026

## **NOTE TO APPLICANTS**

---

**rare** supports graduate student projects through the competitive annual Ages Foundation Fellowship & Bursaries program. This scholarship program is offered once a year. The monetary awards are intended to recognize excellence in academic environmental research including a variety of fields in science and the arts, and to help provide candidates with the resources necessary to complete their projects.

We recognize that historical and present-day barriers exist that disadvantage Black, Indigenous and other People of Colour (BIPOC) from pursuing higher education. The Ages Foundation Fellowship & Bursaries program therefore includes a dedicated BIPOC award. Up to \$15,000 will be distributed annually in the following amounts: one \$5,000 award, one \$5,000 BIPOC award, and up to five \$1,000+ bursaries (based on the number and merit of applications received).

**Annual scholarship applications can be submitted between January 1 and April 1.** Successful recipients will be notified by mid-April.

### Eligibility criteria:

1. You are a graduate student who will be conducting a project at **rare** during the calendar year for the current scholarship competition.
2. Your project has an environmental focus and will utilize **rare** as a field site, case study or in some other capacity.
3. You have not received any previous scholarships from the Ages Foundation Fellowship & Bursaries program.

### Application and payment process:

1. New projects submitted between January 1 and April 1 should submit both a Project Application (see [raresites.org](https://raresites.org)) and this Scholarship Application.
2. Ongoing projects that have already submitted a Project Application form only need to submit this Scholarship Application.
3. Completed forms should be submitted by email to **rare's** Conservation Scientist ([research@raresites.org](mailto:research@raresites.org)).
4. Successful recipients will be notified by mid-April. 80% of the scholarship will be awarded as soon as possible upon acceptance.
5. The remaining 20% of the scholarship will be awarded one year later or upon completion of the project (whichever occurs first) upon receipt of a brief progress report to **rare's** Conservation Scientist.
