

PROACTIVE SERVICES

FROM REACTIVE TO PROACTIVE SECURITY

VanRein Compliance's Proactive Services are designed to help organizations identify, test, and reduce risk before incidents occur. Through expert-led assessments, simulations, and technical testing, our approach strengthens security, supports compliance, builds long-term resilience, and scaled to your organization's needs.

VRC PROACTIVE SERVICES

AI GOVERNANCE

Manage AI risks safely, ethically, and compliantly

What It Does:

- Identifies risks like prompt injection, data leakage, and shadow AI
- Aligns your AI use with emerging standards (NIST AI RMF, ISO 42001)
- Establishes policies, controls, & human oversight

Why It Matters:

AI regulation is rapidly evolving. This is quickly becoming a required part of compliance.

TABLETOP EXERCISES (TTX)

Test how your organization responds to real-world incidents

What It Does:

- Simulates cyber events (breaches, outages, vendor failures)
- Tests decision-making, communication, and response workflows
- Reveals gaps audits don't catch

Why It Matters:

You don't want your first test to be a real incident.

PENETRATION TESTING & VULNERABILITY MANAGEMENT (PEN | VUL)

Find and fix technical weaknesses before attackers do

What It Does:

- Simulates real-world attacks on your systems
- Identifies exploitable vulnerabilities
- Provides prioritized remediation guidance

Why It Matters:

Expected regulatory requirements (2026+) make this essential for compliance and risk reduction.

NIST CSF 2.0 ALIGNMENT

Build and measure a mature cybersecurity program

What It Does:

- Benchmarks your current security posture
- Aligns your program with industry standards (including HIPAA)
- Provides a clear, scalable roadmap for improvement

Why It Matters:

Transforms compliance into a structured, long-term security strategy.

WHAT YOU GAIN

- Reduced breach impact and downtime
- Improved regulatory readiness

- Stronger executive confidence
- Enhanced cyber resilience
- A clear roadmap to higher security maturity

HOW IT WORKS

Assess → Test → Identify Gaps → Improve → Repeat

A continuous, proactive approach to security and compliance.
