

# Information Page

This is a template for the "Secondary School Year Visual Guide 2026 – 2027", to help your child adapt to the changes at the start of a new school year.

You can ask the school staff to help by asking for a walk through of the classroom or take pictures of certain information you believe is important to help your child adapt to their new year.

The blue headings will be a topic relating to the start of the new school year. When you see a black horizontal line, that is where you write the information related to the topic, for example you write down the date school starts on the line under "The first day of school will be..."

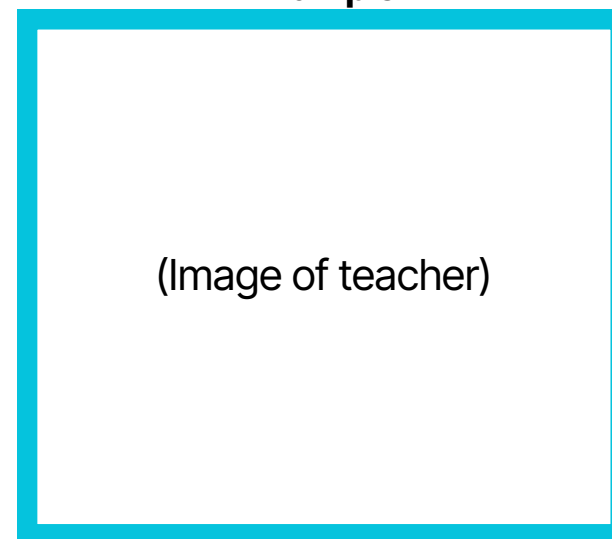

## Example

*The first day of school  
will be...*

1<sup>st</sup> of September 2026 at 8:40

The square with the blue outline is where you place the images related to the heading above it. There will be prompts inside the squares to help guide you on creating your own unique guide, such as (Insert image of the teacher here and write their name on the line below).

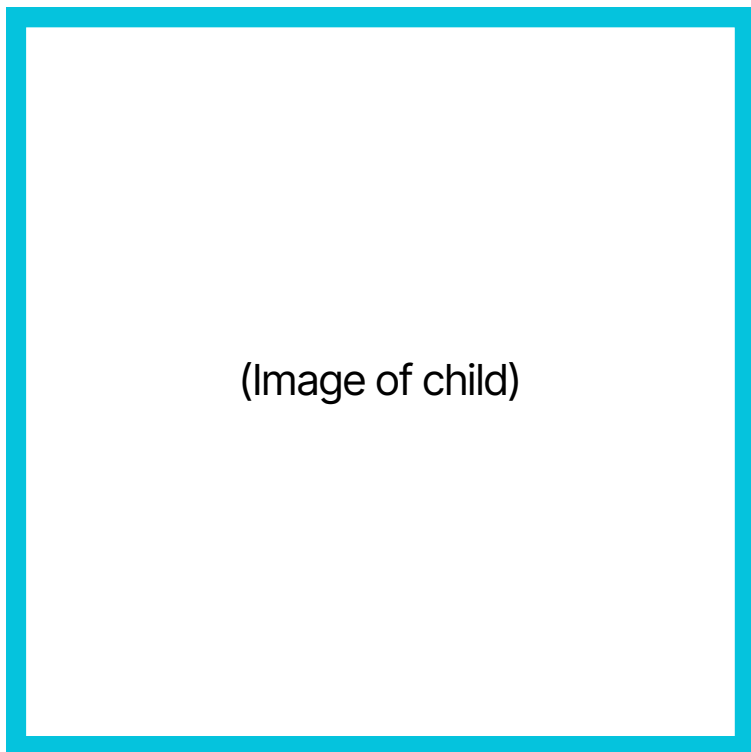

## Example

Teacher's Name:

You can print out your visual guide to fill out the information and use it to help explain the who, what, when and where of the new school year to your child. You can even print out multiple versions of pages relating to other subjects, such as Maths or English.
