

# Rex Glass Protectant: CSS Clean Seal Shine

## CSS: Clean Seal Shine

Enjoy a sparkling clean Rex Glass shower every day with our CSS Glass Protectant

Our **Clean Seal Shine** glass protectant products and kit help to keep your beautiful new glass shower enclosure looking like new!

Before we install your new Rex shower, we factory apply our CSS **Seal** Protectant. The **CSS** after-care kit will be provided at time of installation.

Now your new Rex shower with **CSS Glass Protectant** will be easier to clean and will stay clean longer!

*For normal cleaning and maintenance of shower glass, glass and mirrors, use our ammonia free Rex Foaming Glass Cleaner*

## Features & Benefits

- CSS seals the surface of the glass to prevent staining, contamination, and soap/mineral buildup, which can lead to permanent damage to the glass.
- CSS makes the glass easier to clean and maintain by eliminating the need for harsh, abrasive cleaners.
- CSS maintains the overall appearance of the glass and keeps it looking new.
- CSS is applied to the interior side of the glass only. Customers can opt to coat both sides with an added cost.
- CSS does not make the glass self-cleaning or eliminate the need to wipe down/squeegee the glass after use.
- CSS is expected to work for 7-10 years, assuming proper maintenance per aftercare kit instructions.
- CSS can be used on all glass showers.

### Limescale Cleaner:

While powerful on glass and other shower surfaces, our CSS Limescale Cleaner is concentrated. Always follow product instructions carefully. Avoid direct application to shower hardware to preserve a lasting finish.

**IMPORTANT:** This product is not recommended for use on natural marble or dark colored grout. If unsure, pre-test in a small, hidden area first.

## After-Care

- **Clean (red label)** should be used for stubborn stains and hard water build-up.
- **Seal (blue label)** should be used/applied when water no longer beads on the glass. This is used approximately once every six months. Excessive application of this product can create a greasy/oily appearance on glass due to buildup. To correct this issue, the coating would need to be stripped and reapplied.
- **Rex Foaming Glass Cleaner** should be used for any normal shower cleaning and maintenance that goes beyond daily use.

*For best results, purchase Rex Glass Clean Seal Shine protectant and kit with your new glass shower enclosure.*
