

Privacy and Decorative Film

Looking for a convenient way to add privacy to your space? We have a wide selection of film products that offer an array of options, including tinted, patterned, and frosted films.

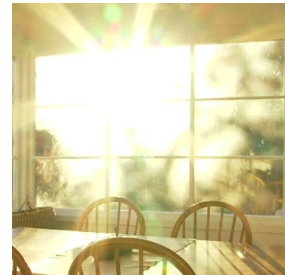

Decorative window film is also a cost-effective option for creating custom decorative features, from frosted privacy bands, branded logos, and unique patterns.

We apply window film products to windows, doors, shower enclosures, partitions, and other smooth glass surfaces.

Solar Control Film

Reduce your energy bills without replacing your windows—let Rex apply our protective films.

Our clear museum grade UV-blocking window film protects your furniture and flooring from harmful UV rays that cause bleaching and damage.

Or choose our Low-e film, heat-reflective, or solar window tint to reduce heat transference through your existing windows.

Safety / Security Film

Safety and Security film is engineered for strength. Once installed, it makes the glass less vulnerable by adding a tough layer that will hold the glass together better upon breakage.

Our security glazing film protects against smash-and-grab incidents, prevents shattering shards from natural events, and secures against intruders.

Gain peace of mind without obscuring your view.

Our window filming process includes:

- We offer a free initial visit for assessment and pricing.
- Professional installation by our technicians.
- During jobsite installation, we ensure extra care is taken, and a thorough cleanup is performed upon completion.

By following these steps, we guarantee the use of the proper materials for your film installation.

Our film solutions are professionally installed and engineered to address building glass issues related to safety, heat, and glare.
