RELIABILITY

At Gary Pools we believe there are two standards of construction – the industry standard and the Gary Pool Standard. The Gary Pool Standard boasts an integrity that rises far above industry expectations.

ECONOMY

The Gary Pools Package comes together at a cost that even the most discerning buyer will appreciate. A Gary Pool is the best value for your money in the industry, and patented money-saving innovations will keep cash in your pocket long after the initial price is paid.

SAFETY

Gary Pools stops at nothing to ensure swimming pool safety as one of our highest priorities. With decades of creative innovation led by industry icon Leif Zars, Gary Pools takes the forefront in developing safety features and national standards, ensuring the safety of your friends and loved ones.

EFFICIENCY

We believe in delivering fun, not work! With some of the most unique and exclusive maintenance savers in the industry, a Gary Pool has lower maintenance requirements than any other swimming pool we know of. After all, we know how hectic life can be without adding to those busy schedules.

STRUCTURAL QUALITY THAT EXCEEDS EXPECTATIONS

Structural Lifetime Warranty

The Gary Pools Structural Schedule is renowned for its excellent structural integrity. In 1961, Leif Zars designed a monolithic wall-to-walk cantilever structure specifically to address the challenges posed by Texas's expansive soil conditions.

Our industry-first patents and major innovations enable us to offer a Lifetime Structural Warranty, which adds value to your home and is transferable.

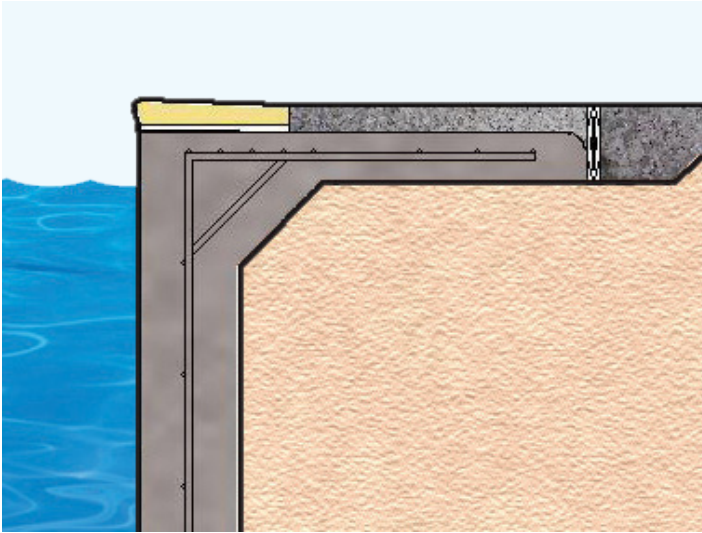

Structural Profile Comparisons

Gary Pools' Patented Cantilever design maintains structural strength even in the worst soil conditions.

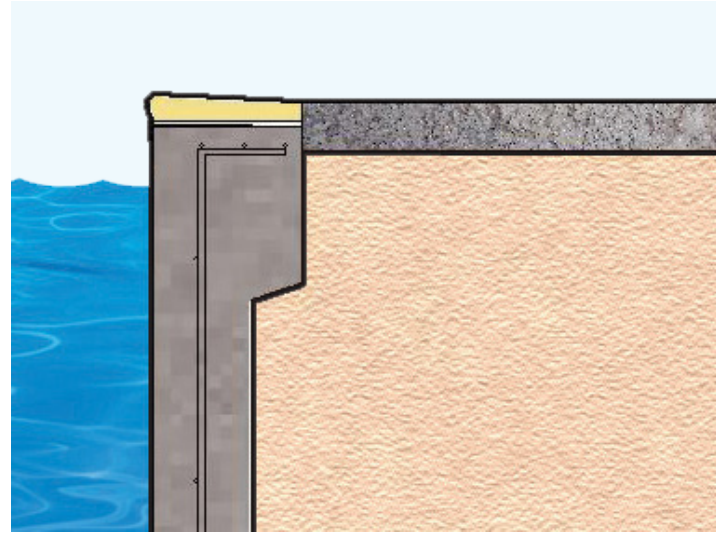

With eight times the strength of a simple beam design, we deliver peace of mind, and our customers love us for it.

STRUCTURAL STRENGTH COMPARISON

Pool Withstands	Gary Pools Cantilever	Typical Beam Pool
Water Pressure	250,560 lb.	52,200 lb.
Earth Pressure	501,120 lb.	62,640 lb.

Gary Pools Cantilever

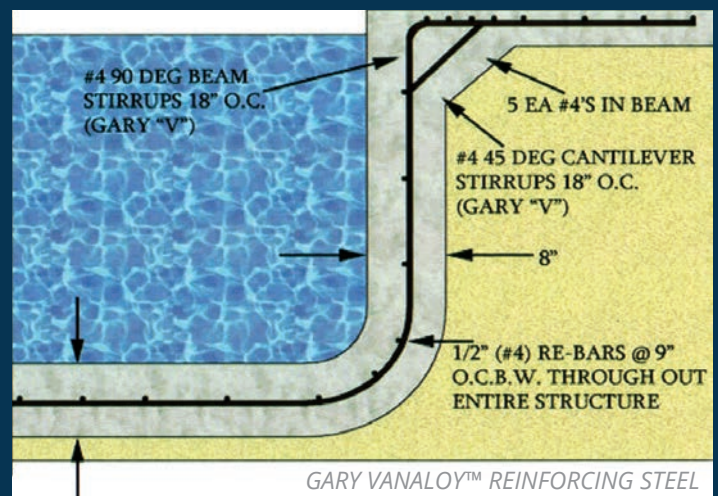

Typical Beam Pool

Exclusive Structural Features

Here are a few exclusive structural differences that contribute to the exceptional strength and longevity of a Gary Pool.

- ASTM Specification A706/A706M Reinforcing Steel, Grade 60
- 5000 PSI Wet Mix Shotcrete
- 8"-11" Thick Walls and Floors, never 6"
- Steel is set at 9" on center
- Galvanized Reinforcing Tie Wires
- Concrete Curing Membrane

THE GARY POOL STANDARD

No one in Texas has been building pools longer than Gary Pools. We believe the industry standards are unacceptable, and we promise you only "The Gary Pool Standards", as we have been doing since 1954!"

AT GARY POOLS, SAFETY IS OUR PRIORITY

At Gary Pools, we build swimming pools that often go beyond both local and national safety standards. Safety requirements are important to us, which is why we invest heavily in research and development, especially in areas like suction equipment and diving geometry, to better ensure your peace of mind.

Because your family's safety is such a high priority, we're happy to assist you with the cost of a pool safety course for your little ones when you purchase a Gary Pool. Please ask your design consultant for more information.

Swimout & Step Tile/ Accent Line

All pools with a depth greater than 5 feet are required to include a safety swim out at the deep end. While many pool builders may overlook this requirement or opt for a less efficient detail, **Gary Pools refuses to compromise on your safety.**

Another feature designed with your safety in mind is the uniform height of all steps accessing the pool. Additionally, optional marker tiles are available for added visibility and safety on all steps, lounges, and benches within the pool.

Aqua Star 32" Channel Drain

The Aqua Star is designed to eliminate suction and entrapment issues caused by high-powered pumps commonly used in swimming pool circulation systems. The suction is distributed over a length of more than 32 inches.

BACKUP SUCTION SAFETY SYSTEM

OPTIONAL POOL FEATURES

Owning a pool should be enjoyable, not a maintenance burden. Gary Pools minimizes maintenance through advanced technology and construction methods. Our Maintenance-Free Pool package ensures low upkeep, saving you nearly \$50 a month compared to other options.

01

Oversized Filter

- Save up to 92% on Rinse vs. Backwash water with our filter
- The Energy and Environment Friendly option saves 800–2,500 gallons of water a season
- Drought friendly
- Keeps your water sparkling
- Saves you from frequent trips to the supply store; our filters do not require the use of D.E. powder

02

VS Omni™ Variable Speed Pumps

VS Omni Variable-Speed pumps are the easiest, most affordable way to add convenient scheduling and smart control to your pool. Control your pool and spa scheduling from anywhere with your smartphone.

- Industry-leading energy efficiency-capable of saving up to 90% in energy costs per year
- Conveniently lets you reduce pump speed to save energy and cut noise from your pool pad

03

MultiCyclone Filter

MultiCyclone pre-filters up to 80% of the filter's incoming dirt load easing the workload of the swimming pool filter. As the MultiCyclone intercepts more and more dirt, the flow rate remains unchanged.

- Improving pool water circulation
- Allowing effective pool vacuuming without burdening the pool filter
- Minimizing filter maintenance and saving water

04

Pre-Filtering

With an exclusive Gary Pools Deep Leaf Skimmer and Pre-Filter, pool maintenance is reduced dramatically when compared to conventional skimmers. The Gary Pools Pre-Filter Skimmer holds 400% more debris and is made of durable long-lasting nylon mesh.

05

Directional Jets

All of our inlets are directionally adjustable and sizable. This allows us to better circulate the pool's water and prevent dead spots where debris settles.

Polaris Pool Cleaner

Spend more time enjoying your pool than cleaning it. Gary Pools offers the latest technology in cordless automatic pool cleaning. Polaris Freedom™ Cordless robotic cleaner provides powerful cleaning with four cleaning modes and sends app notifications when cleaning is done, so you can easily retrieve the cleaner at the waterline.

AquaLink Control: View charging status, select from additional cleaning modes and receive end of cycle push notification from the **AquaLink** app. Polaris Freedom™ scrubs and vacuums the walls and bottom of the pool. Powered by long-life 9.6Ah lithium-ion battery that won't compromise endurance or performance over time.

Automatic In-Line Chlorinator

Powerclean Tab Ultra is the premier CMP line of high-quality pool chemical feeders for In Ground Pools. Powerclean Tab Ultra feeders include advanced features like 100% Shut-Off, a built-in Flow Indicator and an available clear glass lid.

- Holds 12 3" Tablets or 5lbs of 1" Tablets
- Clear lid option for easy service (lid will cloud over time)
- Bottom drain plug
- Automatically feeds chlorine to pool

Ozone Sanitation

Ozone is a 50% stronger oxidizer than chlorine, thus a great sanitizer. Ozone also burns off most foreign bodies in the water including makeup, skin oil and sunscreen residues. The addition of chlorine, liquid or tablets, is still required to fully maintain your pool, but the quantity is greatly reduced.

Salt Chlorinator

With salt chlorination, you don't have to mix, measure or mess around with liquid or tablet chlorine. Heavy chemical odors, itchy skin, red eyes and bleached clothes are a thing of the past. Salt chlorination satisfies 100% of your pool's sanitization needs, leaving you with water that's always clean, clear and luxuriously soft.

PV3 In-Floor Cleaning and Circulation

- Circulates water and chemicals throughout the pool
- Reduces poorly circulated or algae-prone areas
- Eliminates cold spots for more comfortable swimming
- Saves on chemical and heating costs for the life of the pool

Pools Lights

ColorLogic 320 & 160 LED Accent Lights

Ideal for multi-light pools and spas or for highlighting water features, baja shelves, steps, landscaping and more. These versatile 1.5-inch lights are available in two brightness levels and can be installed wet or dry.

Colorlogic 80 & 40 LED Accent Lights

The only 0.5-inch light on the market to coordinate with a full portion of backyard lighting, these low-profile lights can be installed wet or dry and are ideal for hard-to-illuminate areas such as waterfalls, decking, landscape and more.

ColorLogic LED lights come with 10 fixed colors and 7 color-changing light shows, plus even more options when paired with Hayward automation, so it's easy to set the mood for any occasion.

Smart Pool Control

- Control up to four pieces of equipment including your Variable-Speed pump, heater, and pool light conveniently with your smart phone
- Simplifies pool operations and maintenance
- Works with Amazon Alexa voice control

Heaters - HeatPro®

Hayward HeatPro heat pumps incorporate titanium counter-flow heat exchangers or unrivaled and uncompromising performance – even under the harshest conditions.

#1 INSTALLER FLAMED FINISH®

Flamed Finish® is a cutting-edge polyethylene powder coating that provides seamless and long-lasting protection for swimming pools. Applied with precision using compressed air and heat, it cures quickly to create a flawless finish.

THE AMAZING BENEFITS

10-Year Warranty

Flamed Finish® is made to withstand years of use meaning there is less maintenance and repair.

"Balance & Swim"

Simply balance your pool's water chemistry and fill. Additionally, it accommodates the use of automatic pool cleaning and heating devices on day one!

Damage Resistant

Say goodbye to chipping, flaking, and peeling with our high-quality coating that withstand all kinds of wear-and-tear.

Extremely Stain Resistant

Flamed Finish repels spills and stains, keeping your pool looking pristine with minimal effort.

Uniform Color

The secret to a picture-perfect pool, with uniform color that never fades or disappoints.

OUTDOOR LIVING

At Gary Pools, we understand that your dream pool is about more than just taking a dip. It's about creating an entire outdoor living experience. That's why we're proud to offer comprehensive outdoor kitchen design and installation alongside our pool construction services. We can seamlessly integrate a beautiful and functional kitchen into your pool area, complete with top-of-the-line grills, refrigerators, and countertops. This lets you enjoy poolside barbecues, al fresco dining, and all the convenience of having your kitchen right next to the action.

We'll work closely with you to create a custom outdoor kitchen that complements your pool design and your lifestyle, turning your backyard into a true oasis.

FIREPITS

Craving fireside ambiance with your pool? We offer beautiful and safe fire pit options, from built-in to portable, to extend your enjoyment into cooler evenings. Let's create a cozy poolside escape, for unforgettable gatherings!

ACRYLIC WALL

Transform your pool into a stunning focal point with a crystal-clear acrylic wall. Let's create a one-of-a-kind pool that elevates your backyard and adds an unforgettable touch.

ADDITIONAL SERVICES

BEYOND POOLS, WE ARE YOUR FULL-SERVICE POOL EXPERTS

Gary Pools are built to last which is why we are there for your pool's future needs. Our broad range of services will keep your pool in tip-top shape. From weekly cleanings to major upgrades, our experienced service teams are there for you when you need us.

Maintenance

- Comprehensive weekly cleanings
- Backed by the strongest satisfaction guarantees
- Stay in the know with digital appointment recaps

Repairs

- Pool equipment upgrades and repairs
- Licensed technicians that you can count on
- Our special services range from leak detections to inspections & more

Remodel

- Specializing in larger structural additions and restorations
- Our broad scope of work ranges from simple resurfacing to full redesigns
- Servicing residential and commercial properties alike

QUALITY & RELIABILITY SINCE 1954

In 1953, vinyl swimming pools were gaining popularity across the country. Leif Zars noticed this trend and, with a cash investment of \$600, started a business selling vinyl and fiberglass pools out of Scrivener's department store on the North side of San Antonio. These pools were constructed from a redwood box lined with vinyl.

As Zars' pool business started to grow, Gary Pools opened its first stand-alone location at 755 N.E. Military Highway (now 755 N.E. Loop 410) in 1955. However, Mr. Zars soon realized that the soil conditions in central Texas were not ideal for vinyl and fiberglass pools. After three years in business, Gary Pools made a change to pneumatic concrete (gunite) pools, providing a much more durable and longer-lasting swimming pool.

With business booming, there arose a need to service all the swimming pools that Gary Pools was building. Consequently, a Gary Pools service department was opened in 1956 at 8707 Broadway in San Antonio.

In 1960, the Gary Pools Store was established in San Antonio to cater to customers' pool needs. The store sold supplies and maintenance equipment for swimming pools.

The Gary Pools Design Center operated at 13800 San Pedro (Bitters & 281) from 1979 to 2016. Our current location is at 438 Sandau Rd., where we have been selling and servicing swimming pools for over 25,000 happy customers.

Our 1st demo pool at Scrivener's Department Store in San Antonio in 1954.

Our Service Department opened in 1956. Customer service has always been an integral part of our commitment to our customers.

Meet Leif Zars II

NEW OWNERSHIP

Having grown up in the pool industry, Leif learned the art of building a quality pool from his father, who founded the company in 1954. Summer camp was often supplemented with jobsite visits and cleaning the construction yard.

Leif developed a passion for software development and received a degree in software engineering. He worked at several technology startups out of college and enjoyed the challenging nature of the work.

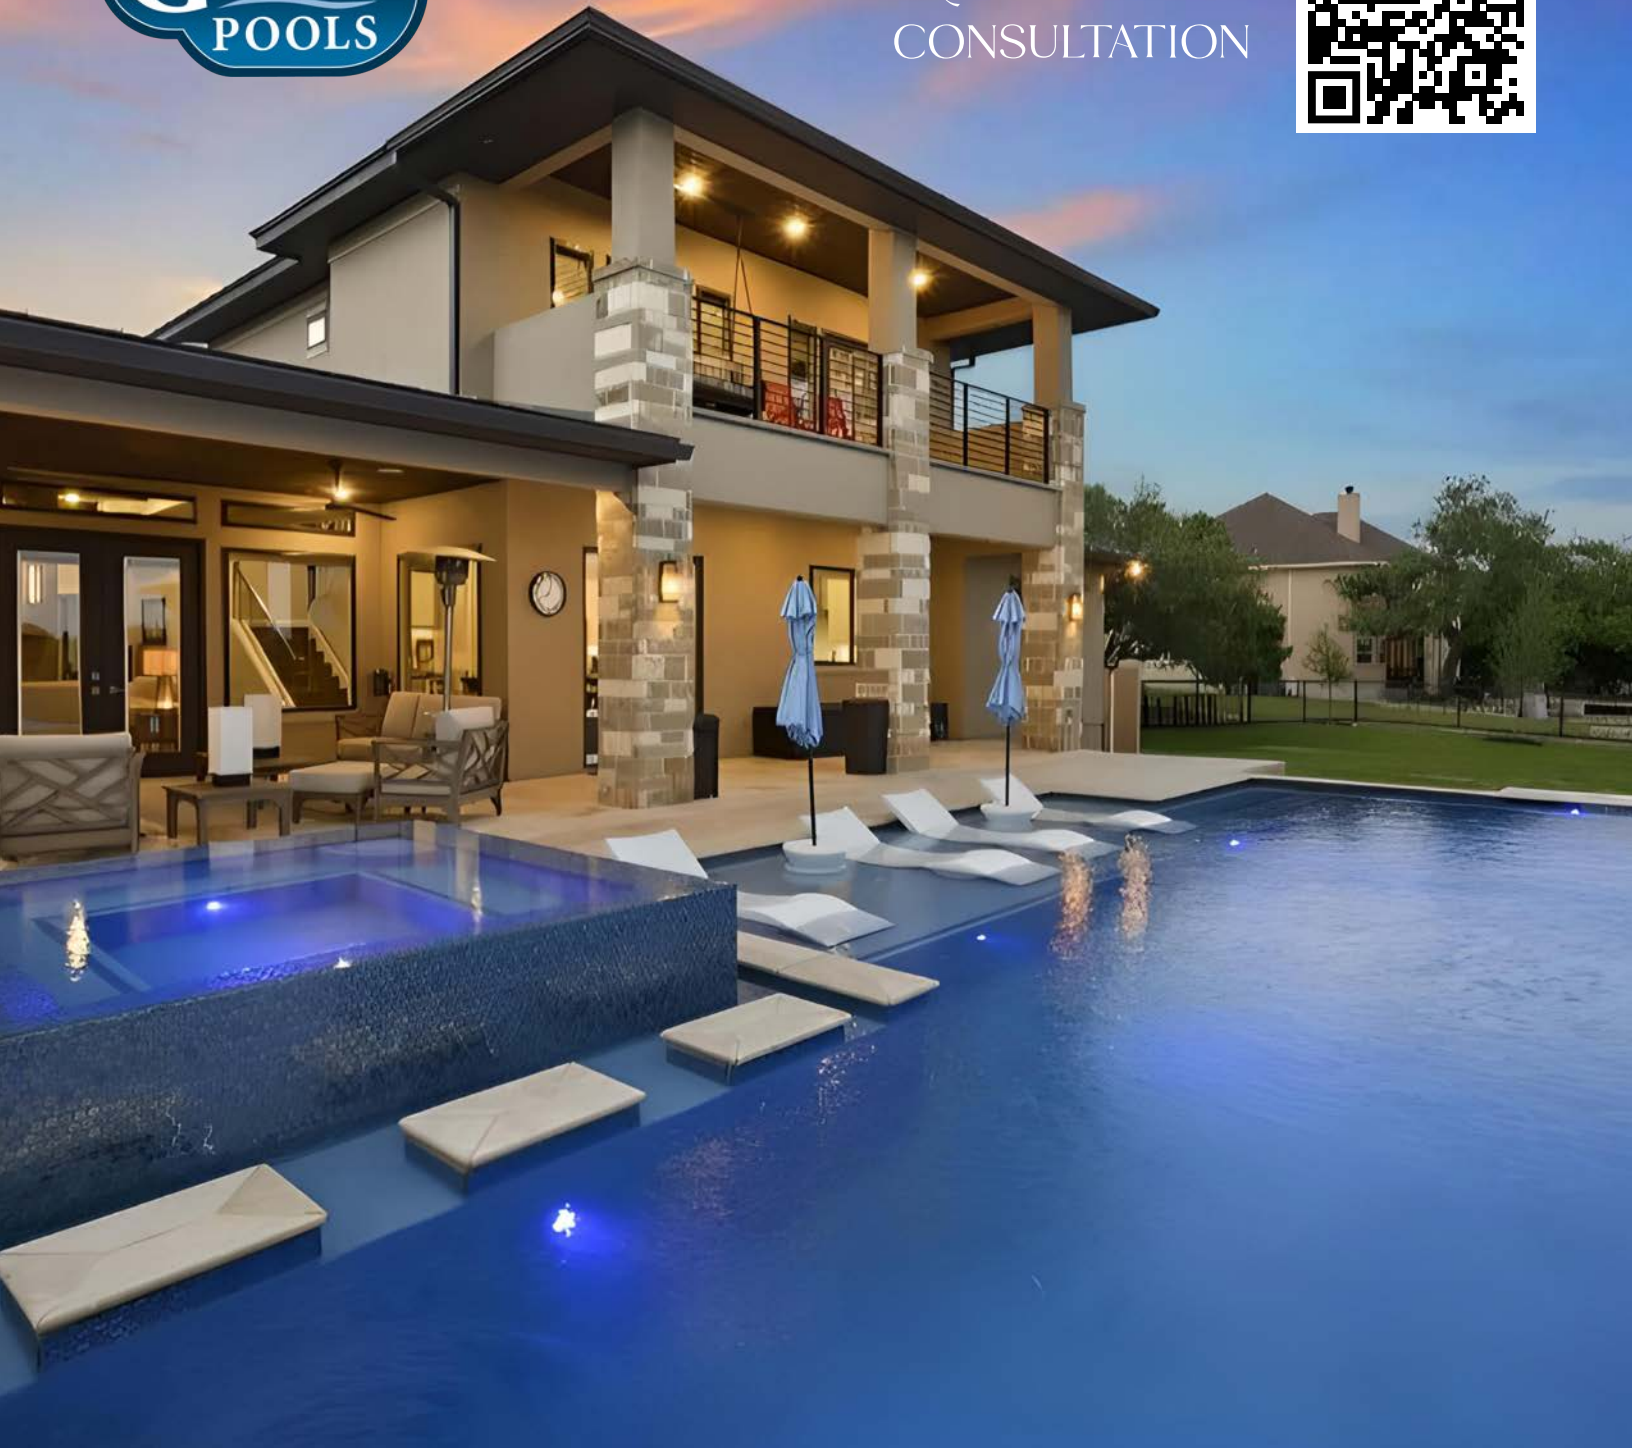

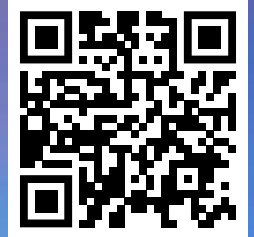

Leif's father wasn't one to ever quit, but at the age of 94, he decided to retire. Consequently, Leif took ownership of Gary Pools, transitioning from engineer to business owner. With 63 years of success behind him, he began preparing for the future of Gary Pools.

Focusing heavily on the Gary Pools team, he has successfully returned a bright future to the company. Leveraging his background in technology, Leif has implemented many systems to aid in the business operations.
