ORDER FORM

The Mutual Fund Report can be ordered at price 360 EUR / year (incl. VAT).

Orders via Sijoitustutkimus:
by telephone +358 9 6227 8770
by fax +358 9 6227 8771
by e-mail: funds@investmentresearch.fi

Return	The return of the fund is the per cent change in share price with paid dividends, management and custodian fees, and splits taken into account. Dividends are assumed to have been reinvested on the ex-dividend date. No taxes have been taken into account. The three, five and ten year returns are expressed in a per annum basis. All return figures are calculated in euros.
Volatility	Volatility describes how rapidly the price of a fund share is likely to change and therefore measures the risk of the investment. It is calculated from the standard deviation of daily returns and is expressed in per cents annually. An often used basic rule is that if volatility is, for example, 20%, the fund's return is within the range of $\pm 20\%$ of fund's expected return on average in two of three years.
Duration	Duration is a measure of a fund's interest rate sensitivity. The greater the duration, the more sensitive the fund is to shifts in interest rates. Duration figures are reported by funds.
Sharpe ratio	Sharpe ratio describes how much extra return compared to a riskless investment the fund has earned per each percentage point of volatility. The larger the Sharpe ratio, the better the fund has performed relative to its risk. The Sharpe ratio is not a reliable measure for money market funds, and thus is not reported for them.
