

FTI Avya[®]

AI-Powered Software Testing, Automation, and Validation Software

Avya is a versatile, MOSA-designed rapid software deployment solution that can serve a wide range of users, from those with basic skills to highly technical professionals. Avya isn't disruptive to current customer environments, and works with virtually all systems, applications, and data types. It provides a path to significantly increase the effectiveness and speed in which complex, interconnected problems can be identified and solved, including:

System performance - Environment & workflows

Standards conformance - APIs

Custom data generation - Audio, FMV & telemetry

Scenario creation - Force movements

Interoperability - Integrate, scale & extend

"The Department's adaptability increasingly relies on software, and the ability to securely and rapidly deliver resilient software capability is a competitive advantage that will define future conflicts. Transforming software delivery times from years to minutes will require significant change to our processes, policies, workforce, and technology."

Dr. Kathleen Hicks, Deputy Secretary of Defense
from the Modernization Strategy of the DoD

Key Benefits

Unique & Custom Data Sets, Test Methods, Analysis & Visualizations

Customize for the Mission

Avya is built for the mission, with an open architecture designed to adapt to mission- and system-specific data, workflows, and environments.

Performance, Conformance & Validation

Performance & Compliance

Confirm your systems meet the highest standards of performance

Scalability on Demand

Scale from the desktop to the enterprise

Seamless CI/CD Integration

Integrate and accelerate your testing & automation

Improve Quality Standards

Enhance quality and reliability into your ecosystem

Understand & Establish AI Trust

Test models against data sets and analyze outputs. Identify anomalies and better understand outputs ad accuracy. Integrate with Cortex for deeper exploration.

MORE ABOUT FTI DEFENSE[®]

FTI Defense delivers AI-powered software rapidly, at affordable cost, and with tech-enabled services to help our nation's warfighters make better decisions, improve mission operations across all domains and adapt to a constantly evolving mission environment. Our AI-powered analytics, modeling and simulation, defensive cyber software, and tech-enabled services bring an entirely new level of multi-agency, multi-domain, and multivariable analysis, visualization, what-if exploration, decision-making, and operational improvement capability to critical national defense initiatives.

All without disruption to existing customer systems, vendor lock-in, or loss of data ownership. Learn more at www.ftidefense.com. Schedule a demo or request more information: product@ftidefense.com.
