Service Contract Labor Standards: The Service Contract Labor

Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/ or when the contractor adds SCLS labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

Commercial Job Title	Data Engineer
Minimum/ General Experience	8 years
Functional Responsibility	Responsible for the design, construction, and maintenance of data processing systems and architectures. They work on database planning and design, ensuring that data structures are efficient, scalable, and secure. Data Engineers integrate various data sources and manage the flow of data across systems, ensuring seamless integration and high performance. They develop and implement data models, algorithms, and complex queries to support business intelligence and analytics. This role involves programming and scripting to automate data processing tasks and optimize system performance. Data Engineers also oversee data/records management, ensuring that data is stored, processed, and accessed in a reliable and secure manner. They conduct rigorous testing to validate data pipelines and system functionality, identifying and resolving any issues that arise. Data Engineers collaborate with data analysts, IT teams, and stakeholders to understand data requirements, provide technical guidance, and deliver solutions that support data-driven decision-making. Their expertise ensures that data systems are robust, efficient, and capable of supporting the organization's data needs.
Minimum Education	Bachelors
Education Substitution	Associate Degree with Two Years of Experience

Commercial Job Title	Data Analyst
Minimum/General Experience	8 years
Functional Responsibility	Focuses on extracting, analyzing, and interpreting data to support decision-making and strategic planning. They design and implement data collection systems and databases, ensuring data integrity and accuracy. Data Analysts perform detailed data analysis, using statistical techniques and software tools to identify trends, patterns, and insights. They prepare reports, dashboards, and visualizations to communicate findings to stakeholders effectively. This role involves working closely with data engineers to ensure data is accessible and structured for analysis. Data Analysts also contribute to programming tasks, developing scripts and queries to extract and manipulate data. They manage data/records, ensuring that data is organized and maintained according to best practices. Additionally, Data Analysts conduct testing to validate the accuracy and reliability of data analysis processes. They collaborate with various teams to understand their data needs, provide analytical support, and deliver actionable insights that drive business decisions. Their analytical skills and attention to detail ensure that data-driven strategies are based on accurate and meaningful information.
Minimum Education	Bachelors
Education Substitution	Associate Degree with Two Years of Experience

Commercial Job Title	IT Analyst
Minimum/General Experience	3 years
Functional Responsibility	Plays a crucial role in analyzing and improving IT systems and processes. They conduct comprehensive systems analysis, identifying areas for improvement and recommending solutions to enhance performance and efficiency. IT Analysts are involved in the integration and design of IT systems, ensuring that new systems align with business objectives and technical requirements. They develop detailed system requirements and specifications, collaborating with developers and engineers to implement solutions. This role involves programming and scripting to support system development and optimization. IT Analysts manage network services, addressing technical issues and ensuring network reliability and security. They oversee data/records management, ensuring that data is organized, secure, and accessible. IT Analysts conduct thorough testing to validate system functionality and performance, identifying and resolving any issues. They work closely with

Commercial Job Title	IT Analyst
	stakeholders to understand their needs, provide technical expertise, and deliver solutions that enhance IT operations. Their analytical and technical skills ensure that IT systems are effective, efficient, and aligned with business goals.
Minimum Education	Bachelors
Education Substitution	Associate Degree with Two Years of Experience

Commercial Job Title	Project Manager
Minimum/ General Experience	6 years
Functional Responsibility	Oversees projects from start to finish, ensuring they meet scope, budget, and timeline requirements. Responsibilities include defining project goals, creating detailed plans, and managing resources. They lead cross-functional teams, ensuring effective communication and collaboration. The role involves risk management, budget oversight, and maintaining project documentation. Project Managers monitor progress, perform regular status reviews, and adjust plans as needed. They engage with clients and stakeholders to provide updates and gather feedback. Post-project evaluations are conducted to identify successes and areas for improvement. Proficiency in project management methodologies (Agile, Scrum, Waterfall) and tools is essential, along with a strong understanding of IT systems. They ensure projects align with organizational goals and contribute to growth.
