ABOUT US

A Story of Passion, Innovation and Growth

Born from a shared passion for firearms and a commitment to excellence, Caretta Arms İmalat İthalat ve İhracat San. Tic. Ltd. Şti. emerged in 2017 as a vision crafted by four dedicated co-founders.

Their journey began with the meticulous production of shotgun springs in 2015, laying the groundwork for their future endeavors. Fueled by a pursuit of knowledge and their years of experiences, the founders got to work in 2015 intense research and development which will take a two-year period. The period was the beginning spot of innovation, where they meticulously honed their skills and they perfected their crafts. R&D culminated in the launch of the first AR type bullpup shotgun in 2017, marking a significant milestone in Caretta Arms' establishment.

Crowning our production story that started in small workshops with exports, we have expanded our product range with different models by years. We are manufacturing our products for both domestic and global clients in our brand-new factory consisting of 5500 square meters starting in 2021.

Our commitment to innovation and customer satisfaction fuels Caretta Arms' ongoing journey to establish our company as a leading force within the industry. We follow up the trends and new technologies emerging in the firearms industry by continuously seeking to redefine the expectations of firearms enthusiasts worldwide. So that we address our R&D projects and we are expanding the product range reflecting a meticulous blend of functionality and elegance with our passionate teams.
