

Disrupting the massive,
hidden inspection market

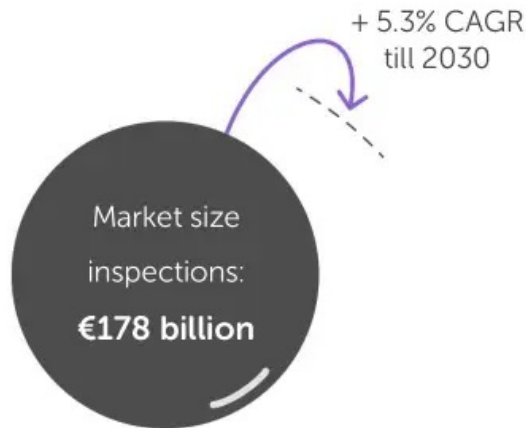

We target a hidden **€178 billion** market

Inspections ensure compliance with standards

Examples

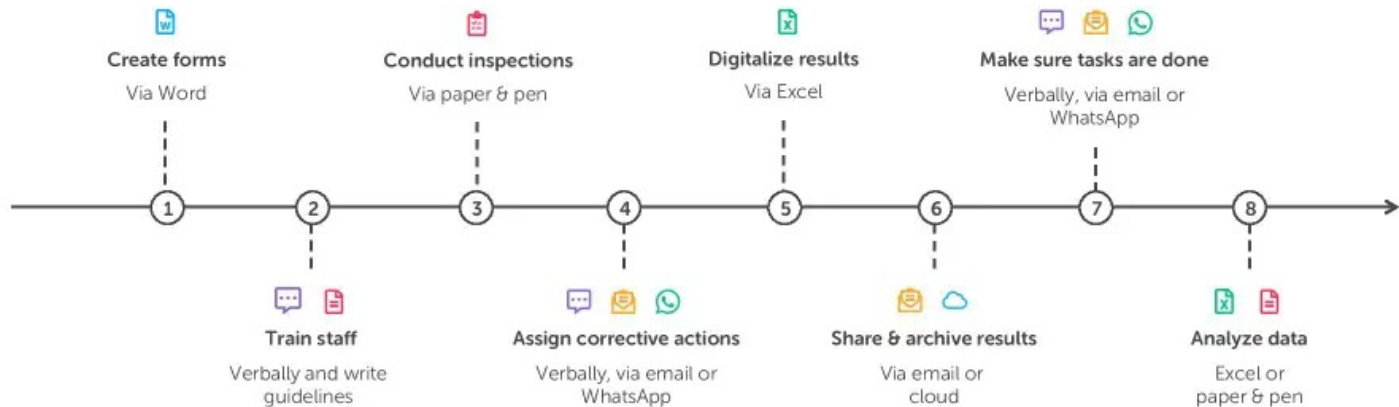

-  Safety walks on construction site
-  Risk assessments in production plants
-  Hygiene documentation in gastronomy chain
-  Vehicle maintenance checks

Thousands of use cases

Paper & Pen is still the #1 tool for conducting inspections

High expenditure of time | costly quality & safety issues

Lumiform simplifies **inspection workflows**

- 1. Create forms in a snap**
2. Conduct inspections via app
3. Assign & track corrective actions
4. Get & share custom reports
5. Monitor, analyze & improve

The screenshot displays the 'TEMPLATE BUILDER' interface for a 'Building Fire Risk Assessment' form. The top navigation bar includes a back arrow, the title 'TEMPLATE BUILDER', and a breadcrumb trail: '1. Build > 2. Settings > 3. Customize report'. On the right, there are two buttons: 'Save as inactive' and 'Save & activate'.

The main form area is titled 'Building Fire Risk Assessment' and contains a section labeled 'Audit' with a 'Required' status. The 'Audit' section is expanded, showing a 'Risk Assessment - Premises' subsection. This subsection includes a 'Repeat section' button, a 'Weight' dropdown, and a list of questions with corresponding answer options.

The questions and answers shown are:

- Question: 'Are the buildings free from the risk of fire spreading from anything in the areas outside the building/s?'
Answers: 'Yes' (green), 'No' (red), 'N/A' (grey)
- Question: 'Is the external building fabric in good condition?'
Answers: 'Yes' (green), 'No' (red), 'N/A' (grey)

Below the questions, there is a conditional logic section with the text 'If answer is exactly' followed by a dropdown menu showing 'No' and a 'then' section with a 'Photo' button.

On the right side of the interface, there is a 'Preview' section showing a mobile app view of the 'Building Fire Risk Assessment' form. The preview shows the same questions and answers as the main form, with a 'Header' button at the bottom.

1,203% ROI over 3 years

The screenshot displays a mobile application interface for a 'Fire Risk Assessment'. At the top, a breadcrumb trail reads 'Fire Risk Assessment > General Care >'. Below this, a text prompt asks to 'Ensure that fire alarms are maintained on a regular basis and that the results are logged'. Three response buttons are provided: a green 'YES' button, a pink 'NO' button, and a white 'N/A' button. Below the buttons are icons for a megaphone, a speech bubble, and a camera. A section titled 'Add pictures of all fire alarms' contains a blue 'TAKE PHOTO' button with a camera icon. The final section prompts the user to 'Ensure that the alarms can be heard throughout the premises', with 'YES' and 'NO' buttons below it.
