MARKET INSIGHTS: WHY BTR DEMAND IS ACCELERATING

A SHIFTING RENTER PROFILE

Today's BTR renter is not simply priced out of homeownership—they often choose to rent for lifestyle and flexibility. These "discretionary renters" are attracted to BTR properties that mimic the homeownership experience—offering garages, fenced yards, and dedicated office space for remote

work—while avoiding the long-term commitment of a mortgage. This preference is growing among renters at all life stages, from young professionals and growing families to empty nesters, who value the space and autonomy of a single-family home without the burdens of ownership.

Preference to Rent

Source: New Home Trends Institute by John Burns Research and Consulting, LLC, May-June 2024 survey of 7,625 build-to-rent residents across the U.S.

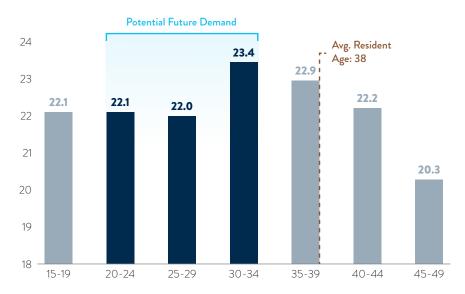

SUPPLY-DEMAND IMBALANCE

The need for rental housing is outpacing supply. U.S. Census data shows that while the population grows, housing starts—especially single-family—have not kept up. This supply gap fuels demand for BTR as a scalable, institutional-grade rental solution.

Current U.S. Population Distribution by Age Group

(Millions of People)

Source: U.S. Census Bureau, as of Dec. 2024

These factors are pushing them toward renter-friendly alternatives, particularly BTR communities that offer the space and privacy of a home without the financial commitment of ownership.

Millennials are driving BTR future demand

Millennials, now the largest generational cohort in the U.S., are entering their prime years for single-family living—but many face:

STUDENT DEBT BURDENS

HIGH MORTGAGE RATES

LIMITED FOR-SALE HOUSING SUPPLY

PREFERENCE FOR MOBILITY AND FINANCIAL FLEXIBILITY

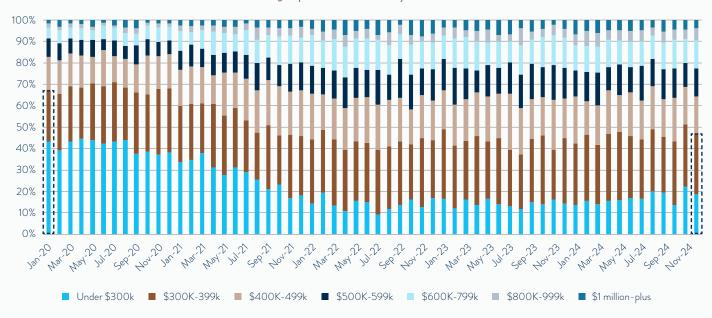

AFFORDABILITY GAP WIDENS

The cost of homeownership has surged. Driven by rising home prices, elevated mortgage rates, and increased taxes and insurance premiums, homeownership is increasingly out of reach for many would-be buyers. With rising interest rates and inflationary pressures, many households choose BTR communities for cost savings and lifestyle appeal.

RENT VS. OWN: A COMPELLING COST COMPARISON

BTR offers a compelling value proposition for cost-conscious renters seeking home-like living without the burden of ownership.

For example, in Columbus, Ohio, a for-sale home with comparable features to a nearby BTR unit costs \$4,221 per month to own—versus \$3,100 to rent—a 27 percent discount.

THE BENEFITS OF **BUILD-TO-RENT** INVESTMENT

INSTITUTIONAL-GRADE STABILITY

BTR combines the physical characteristics of single-family homes with the operational and financial structures of multifamily properties. The result: stable cash flow, professional property management, and reduced vacancy rates relative to traditional rentals. According to Fannie Mae research, BTR occupancy rates hover at 96 percent, 200 basis points (or two percentage points) above the multifamily occupancy rate.

DIVERSIFIED PRODUCT TYPES

The sector includes single-family detached homes, townhomes, and horizontal apartments. This diversity allows developers and investors to tailor their BTR strategy to market preferences, site constraints, and return expectations. Walker & Dunlop's research indicates investor preferences are weighted toward single-family detached and townhome built-for-rent products in acquisitions. Among tracked sales, singlefamily detached units consistently command the highest price per unit as they most closely replicate the feel of traditional homeownership.

HOW WALKER & DUNLOP HELPS CLIENTS CAPITALIZE

As one of the leading firms in commercial real estate finance, Walker & Dunlop offers a full suite of capital solutions to support every stage of BTR development, acquisition, and investment strategy. Our integrated platform connects clients to deep market expertise, strategic advisory, and an expansive network of capital providers.

Agency financing:

Walker & Dunlop has deep experience navigating BTR-specific loan programs from *Fannie Mae and Freddie Mac*, including forward commitments and lease-up flexibility. As the #1 Fannie Mae DUS® Lender in 2024, we help clients access attractive terms, non-recourse structures, and scalable financing aligned with long-term hold strategies.

Capital Markets access:

Through our <u>Capital Markets team</u>, clients tap into a broad range of debt solutions, including construction loans, bridge financing, and permanent debt from life insurance companies, regional and national banks, and private debt funds. Our relationships and real-time market insights ensure competitive pricing and optimal structures tailored to BTR assets.

Equity placement:

Walker & Dunlop has successfully arranged joint venture <u>equity placements</u> with leading institutional investors. Whether launching a programmatic partnership or capitalizing a single asset, we align developers with equity sources seeking exposure to the BTR sector's growth and stability.

Advisory services:

Our <u>Advisory team</u> delivers customized guidance across the capital stack—from feasibility and capital structuring to exit strategy planning. With a holistic view of the market and deep transactional expertise, we help clients mitigate risk, unlock value, and accelerate execution.

Whether clients are sourcing construction capital, acquiring stabilized assets, or recapitalizing portfolios, Walker & Dunlop delivers seamless execution and a proven track record across the BTR landscape.

REAL-WORLD EXAMPLES: SUCCESSFUL BTR TRANSACTIONS

Walker & Dunlop's leadership in BTR is demonstrated by notable transactions nationwide. Here is a quick sampling of some of our work.

Each of these examples underscores the strength and scalability of BTR, as well as Walker & Dunlop's role as a trusted advisor from capital sourcing through disposition.

BTR CHALLENGES AND WALKER & DUNLOP'S SOLUTIONS

Despite strong momentum, the build-to-rent sector is not without its complexities. Developers and investors must navigate challenges impacting project feasibility, profitability, and long-term success. These include:

Zoning and entitlement hurdles:

Many municipalities still lack zoning classifications tailored to BTR, often grouping it with either traditional multifamily or for-sale subdivisions—neither of which cleanly aligns with BTR's hybrid nature.

Rising land and construction costs:

Escalating costs for land acquisition, materials, and labor can compress margins and delay timelines, particularly in highdemand growth markets.

Market saturation concerns:

As BTR activity accelerates in hot metros, questions around absorption, long-term rent growth, and tenant demand sustainability are becoming more common.

HOW WALKER & DUNLOP HELPS CLIENTS OVERCOME THESE CHALLENGES

Local market expertise

Our teams have a deep understanding of regional dynamics and submarket nuances, allowing us to guide site selection, underwriting, and development strategy. We help clients identify locations with favorable zoning environments, strong renter demographics, and long-term growth potential.

Proprietary data and analytics

With access to exclusive market intelligence—including rent comp data, absorption trends, and pipeline tracking—Walker & Dunlop equips clients to make informed, data-driven decisions. This insight is critical for gauging project viability and investor confidence, especially in competitive or emerging markets.

Relationships with agencies and municipalities

Our long-standing connections with Fannie Mae, Freddie Mac, and HUD—as well as local planning authorities—enable us to anticipate regulatory requirements and advocate for more flexible BTR treatment. We help clients navigate entitlements, permitting, and policy barriers that could otherwise delay or derail projects.

Comprehensive execution capabilities

From capital sourcing and equity placement to investment sales and advisory, Walker & Dunlop brings together every piece of the deal lifecycle. This end-to-end support helps clients de-risk execution, accelerate timelines, and optimize capital structure—whether building, acquiring, or recapitalizing BTR assets.

With our national reach and multidisciplinary platform, Walker & Dunlop is uniquely positioned to help clients address today's BTR headwinds while capitalizing on the sector's long-term opportunity.

APPENDIX: UNDERSTANDING BTR PRODUCT TYPE

The build-to-rent sector encompasses a diverse range of housing formats designed to meet varied renter preferences and development strategies. Understanding the nuances between these types is key to identifying the right investment or development approach.

SINGLE-FAMILY DETACHED

Overview: Traditional standalone homes built for rental use. These units typically feature private yards, driveways, and garages, offering the closest experience to homeownership.

Ideal for: Suburban and exurban locations where land is more available, targeting families and long-term renters who value space and privacy.

LUXURY SINGLE-FAMILY

Overview: High-end, purpose-built detached or attached rental homes on individual lots offering premium finishes, spacious layouts, and upscale community amenities designed to rival custom for-sale housing.

Ideal for: Affluent renters-by-choice—such as executives, relocating professionals, and downsizing homeowners—who want flexibility without sacrificing luxury.

TWO-STORY TOWNHOMES AND SINGLE-LEVEL ROWHOMES

Overview: Homes in two to seven-unit building configurations, often with individual entrances and private garages.

Ideal for: Urban-adjacent neighborhoods and infill sites where density is important, catering to young professionals with or without children or downsizing households.

HORIZONTAL MULTIFAMILY

Overview: Detached or semi-detached single-story units, typically with a "cottage home" design, arranged within a managed rental community, often with shared amenities such as a clubhouse, pool, or gym.

Ideal for: Markets where renters want single-level living with minimal shared walls, catering to young singles/roommates, couples, and renters up to age 54, with a high percentage being pet owners.
