

Care Instructions for Printed Natural Fabrics

To keep your fabric looking its best, we recommend washing with care:

- Wash in cold water with similar colours. For the first couple of washes, wash the item separately.
- Avoid using stain removers, as they may fade or remove the pigment print.
- Turn garments inside out before washing and drying—this helps the print last longer.
- Gentle hand wash in cold water is best.
- Avoid harsh detergents, hot or industrial washes, and heavy spinning.
- Do not bleach.
- Drip dry in the shade—do not wring or scrub the fabric.
- Iron on the reverse side if needed.

Please note: a small amount of shrinkage (around 3%) may occur.
