# Feed Silo Monitoring

HALO

Monitor and control your critical on-farm infrastructure from anywhere.

Capture the Information that Matters

Halo's Feed Silo Monitoring product provides users with complete oversight of their feed silo levels.

- **Feed storage levels** – Make informed decisions about when to fill or empty your silo so you don't run out of feed at critical times.

- **Safety first** – Prioritise safety by eliminating manual silo checks at heights.

- **Real-time monitoring and alerts** – Automated alerts and notifications keep users informed about low inventory levels, allowing them to take immediate action to avoid stockouts.

- **Automatic feed ordering** – Send a text alert to your feed supplier to order at your preferred set point.

- **Multi-silo support** – Save time and view multiple silos via a single screen view.

- **Ease of install** – Simple to install, plugable solution.
