

MAXIMISE YOUR FEED

HALO Feed Silo Monitoring

Save time, stop the climb

Halo's plug-and-play Feed Silo Monitoring system gives you absolute visibility and control over your critical on-farm feed infrastructure from anywhere. By replacing risky, manual climbing with automated, real-time level tracking, you eliminate the guesswork from inventory management, protect your team's safety, and ensure your stock never faces an unexpected shortage.

Complete Silo Functionality

- **Storage Level Tracking:** Make highly informed decisions about exactly when to fill or empty your silo, ensuring you never run out of feed at critical times.
- **Safety-First Design:** Prioritise farm safety by completely eliminating the need for staff to perform manual silo checks and inspections at dangerous heights.
- **Automatic Feed Ordering:** Streamline your supply chain by automatically triggering a text alert to your feed supplier the moment inventory hits your preferred set point.
- **Multi-Silo Support:** Engineered for scaling operations. Save time by viewing, tracking, and managing multiple silos simultaneously via a single, centralised dashboard.
- **Easy Installation:** A simple, pluggable solution engineered for fast setup with minimal disruption to your daily feeding schedule.

Smart Configurable Alerts

Get instant, proactive text alerts sent straight to your phone the moment your inventory levels drift:

- **Critical Feed Level LOW:** Triggers immediately when a silo drops below your pre-configured safety threshold, giving you plenty of lead time to schedule a delivery and avoid costly stockouts.
