

LEO Lab is a state-of-the-art custom orthotic laboratory employing the latest in advanced additive manufacturing (3D Printing) to produce truly custom precision orthotics. With a depth of technical knowledge and know-how, and a collaborative approach to design and fabrication, the LEO Lab team is the ideal partner for you and your patients.

## **The LEO Lab difference – People, Technology, Passion, Custom and Service!**

**People** – Knowledgeable, Experienced, Committed, Educated

The LEO Lab team has a wealth of knowledge and experience, both from a clinical and fabrication perspective, and includes a Chiropodist and Engineer. This gives LEO Lab the inherent ability to translate any prescription, pathology or complex biomechanical presentation into a viable and pathology-specific orthotic. An orthotic that is truly and ethically custom from conception through design and fabrication, whether 3D printed or conventionally made. An orthotic that is 100% to spec!

LEO Lab's in-house Chiropodist bridges the gap that often exists between pathology, prescription, and clinical outcome. A clinician behind every design ensures that the practitioner's prescription translates from page to final product.

### **Technology**

Following two and half years of research and testing, LEO Lab was the first-in-Canada to invest in a state-of-the-art 3D printer. This enabled LEO Lab to bring innovation to the market place that hadn't been seen before. With an ability to now offer conventional, 3D Printed and hybrid 3D Printed devices (combining 3D Printing with soft adhered materials), we provide the industry the best of all worlds. The introduction of this high-tech equipment made LEO Lab a pioneer in the industry and one of only a handful globally that have done so.

With 3D printing, we significantly reduce our carbon footprint and waste generation, and we are able to achieve accuracy and perfection that will ensure perfect repeatability, time and time again.

### **Passion**

At LEO Lab we are passionate about what we do. We consider ourselves an extension of your business and understand that your patient's happiness is your success and, in turn, ours.

### **Custom**

Every single orthotic produced by LEO Lab is 100% truly custom. This is a fundamental and non-negotiable aspect of our business and values. With podiatric input into each design and an open invitation for practitioners to contact the lab to discuss complex clinical cases, we can ensure a truly custom device that seeks to enhance and augment clinical outcomes

### **Service**

LEO Lab prides itself on providing an unparalleled level of customer service! We are here for you. Whether you need a question answered, a case discussed, assistance with an account, help with material, design inputs or options, or even guidance on our 3DP Printing technology capabilities and how it can be utilized in relation to your patient's specific needs.

Our philosophy is one of best practice whereby we strive to continually improve the quality of our product and the level of service we deliver to you and your patient.
