This checklist is designed to help you understand exactly what our platform offers, from the first digital handshake to Digital Product Passport.

Collect & Authenticate

Collect environmental & social data on product and facility level from primary source.

- Collect** primary source supply chain data directly from partners across your entire value chain.
- Authenticate** using time- and geolocation stamps and by notarising it on the blockchain.
- Secure** claims with primary source data, including certificates and order documents.

Analyse

Transform authenticated data into actionable environmental insights.

- Calculate** your footprints including water, energy, and GHG emissions.
- Consolidate** primary data for Scope 2 and Scope 3 value chain reporting.
- Map** Tier 3 and Tier 4 details, such as raw material and spinning, for a complete overview.

Act & Improve

Use the ESG dashboard to drive strategic change.

- Automate** compliance and risk management using Code of Conduct (CoC) and Restricted Substances Lists (RSL).
- Utilise** real-time ESG dashboards with facility and product-level data to drive improvements.
- Detect** non-compliance instantly to identify and address risks before they become liabilities.

Communicate

Get a Digital Product Passport (DPP) for radical transparency.

- Translate** complex value chain data into a transparent and engaging product journey.
- Share** authenticated insights via QR codes.
- Meet** evolving legal requirements by providing primary source evidence.
