

Saved 6-10 Hours Per Project & Boosted Estimating Process by 40% with Beam Al

Automated takeoffs help increase weekly bid volume without additional hires

6-10 hours saved per project

40% faster estimate turnaround

Reduced revision time,

even with multiple

addenda

Beam Al took the worst part of estimating, the measuring, counting, and spec-checking, and made

it automatic. No more

burning hours before I

even get to the bid.

ABOUT

Founded in 2022, 24seventeen Estimating Services is a fully remote estimating firm established by industry veterans. The company has already delivered over \$40 million in accurate, field-ready estimates for projects ranging from high-end residential builds to complex commercial developments.

Beam Al improved takeoff accuracy by catching previously overlooked issues.

CHALLENGES

Even after using McCormick, the team used to manually measure and symbol count for every feeder, device, and plan notes.

Time-intensive revision process,

especially with multiple addenda.

quantities and measurements, and delivers ready-to-use Large, multi-floor projects material quantities, saving consumed significant time. 6-10 hours per project.

BUSINESS

Higher throughput, more estimates processed weekly without expanding team size.

Improved accuracy, Al-based takeoffs reduced rework and missed items.

Freed up time to focus on pricing and winning bids

instead of grinding through

drawings.
