

SUCCESS STORY

DTF Rosemount Saves 6 Hours/Takeoff and Increases Monthly Bid Capacity by 2X with Beam AI

Improved accuracy, faster turnaround, and created a scalable estimating process

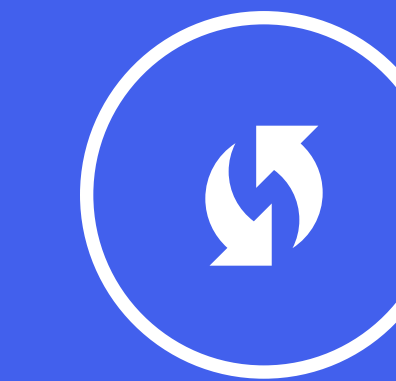

SAVED 6 HOURS/TAKEOFF

DOUBLED MONTHLY BID VOLUME: FROM ~2 TO 4-5 BIDS

IMPROVED CONSISTENCY AND ACCURACY IN TAKEOFFS

ENABLED GROWTH WITHOUT HIRING AN IN-HOUSE ESTIMATOR

FREED UP OWNER TIME TO CONVERT MORE LEADS AND REFINE SCOPE

“We were outsourcing takeoffs through Fiverr, but the accuracy wasn't consistent, and turnaround times often stretched beyond a week. With Beam AI, we now get reliable takeoffs much faster.”

Andrew Utschig
Owner,
DTF Rosemount

ABOUT

DTF Rosemount

DTF Rosemount is a general contractor serving Fairfield and Westchester County. The team specializes in residential remodeling, home additions, and construction management, with expertise across rough and finish carpentry, custom millwork, flooring, and interior and exterior finishes, and more.

“Beam AI has been a huge time saver. We’re saving at least six to eight hours per takeoff.”

BREAKING DOWN KEY WINS

With Beam AI, DTF Rosemount streamlined its estimating workflow, unlocking faster turnaround, higher accuracy, and the ability to bid more without adding overhead.

/1

6-8 hours saved per takeoff: Time savings enabled the team to move bids forward more quickly and focus on higher-value work.

/2

Faster bid turnaround: Takeoffs that took 1 week+ through Fiverr are now completed significantly faster, improving responsiveness to bid opportunities.

/3

2X increase in bidding capacity: With quicker, more reliable takeoffs, monthly bid volume increased from ~2 bids to 4-5, with the ability to send up to 1 bid/week.

/4

Higher accuracy & consistency: Beam AI delivered dependable quantities, eliminating variability caused by Fiverr, improving confidence in estimates.

/5

Scaling without hiring: By replacing outsourced estimating, Beam AI provided a viable alternative to hiring an in-house estimator.

CHALLENGES BEFORE BEAM AI

Before adopting Beam AI, the team outsourced its takeoffs to Fiverr, which created several bottlenecks:

/1

Slow takeoff turnaround: Outsourced takeoffs often took a week or more, delaying bids and slowing response times.

/2

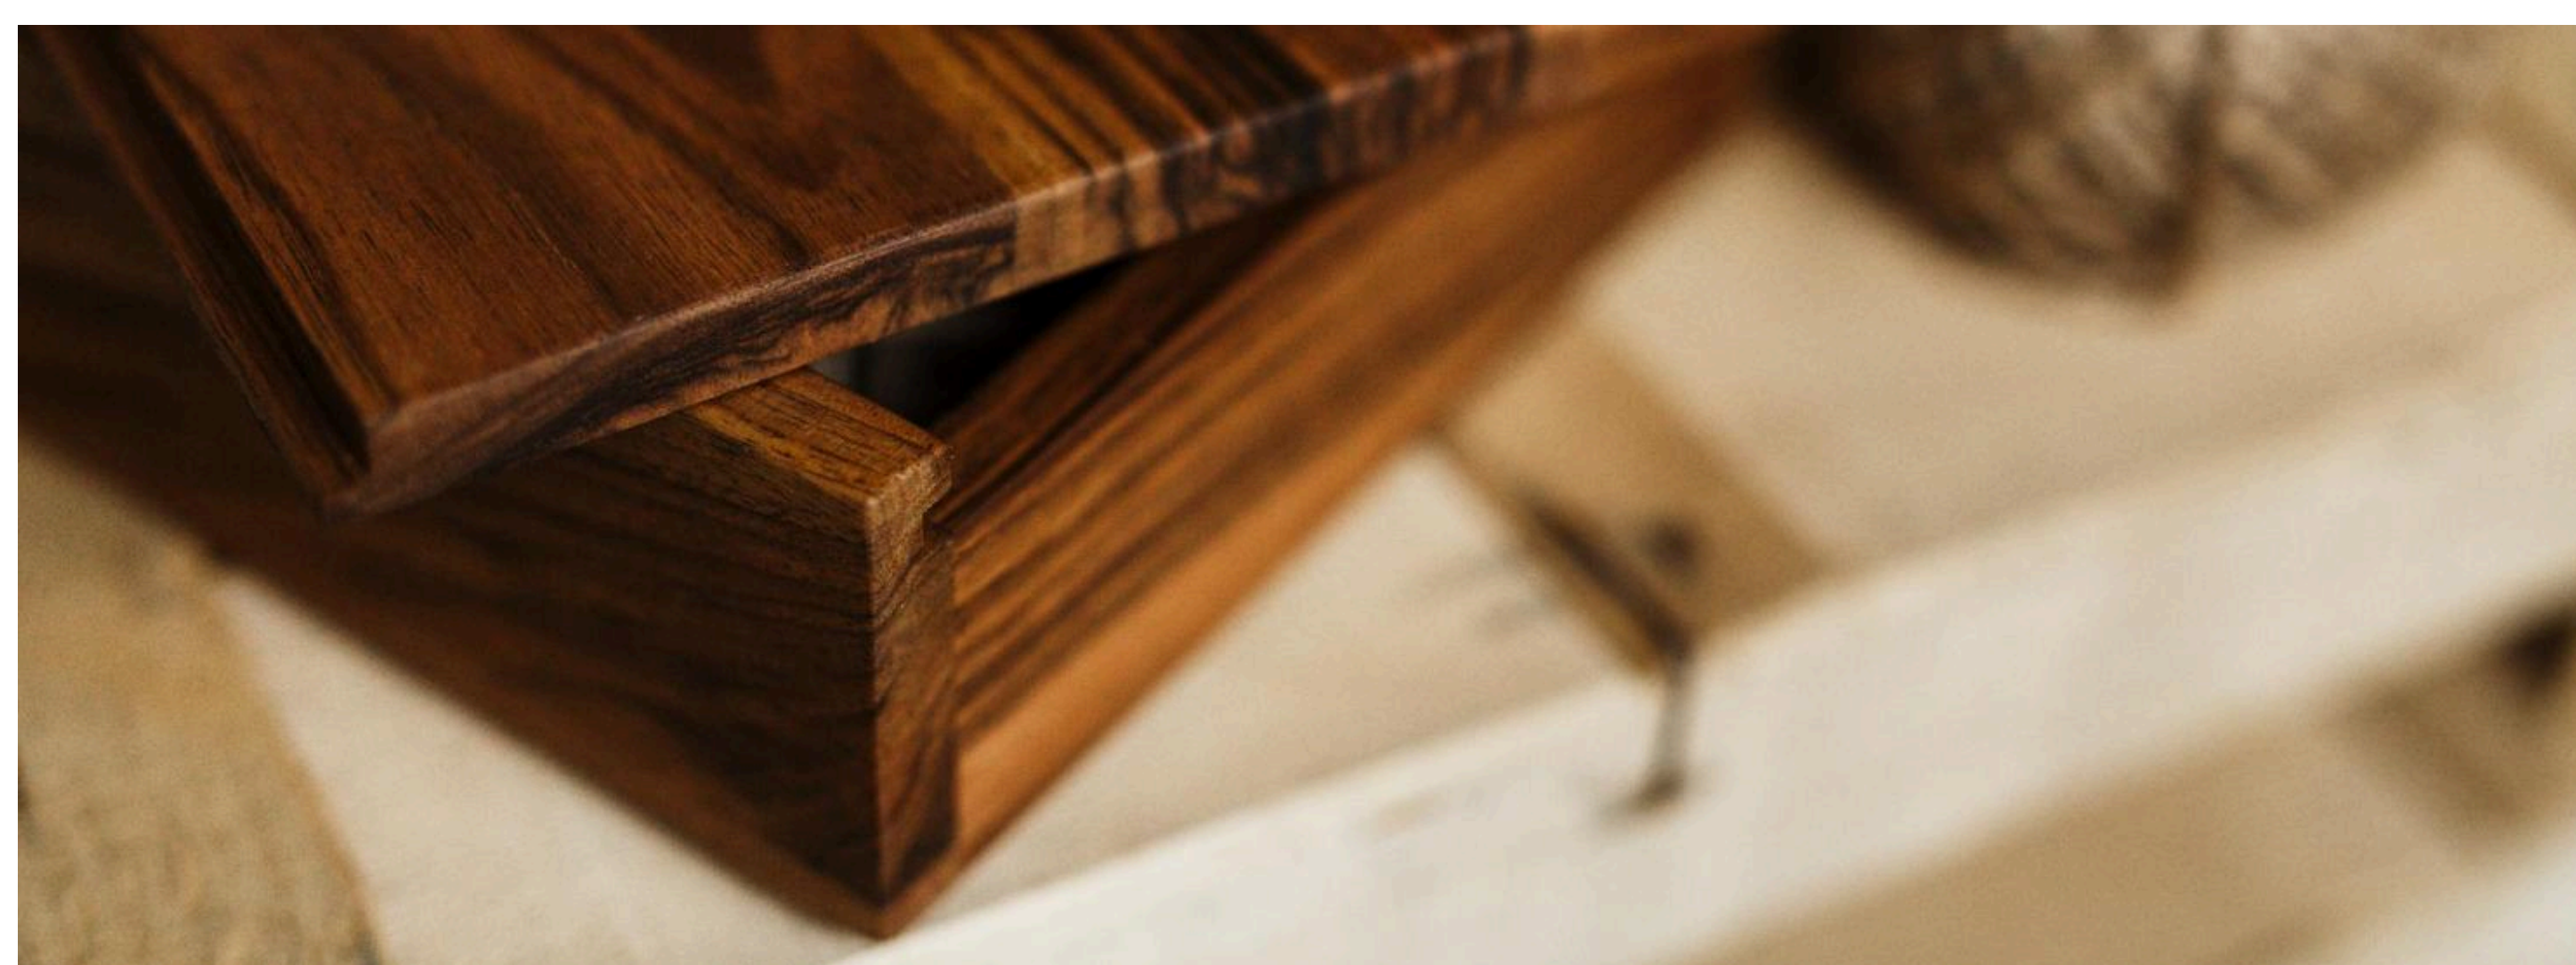

Inconsistent accuracy: Takeoff quality varied depending on who completed the work, making it difficult to trust the numbers.

/3

Restricted bidding capacity: Long turnaround times limited how many bids the team could realistically pursue each month.

/4

Owner time consumed by takeoffs: The owner spent excessive time reviewing quantities instead of focusing on lead conversion and project execution.

Final Thoughts

"It's very easy to use. Anyone with basic experience using estimating tools and the internet will find it straightforward."

BUSINESS IMPACT

— Doubled monthly bid output without growing the team.

— Freed up owner time to focus on sales and lead conversion.

— Created a scalable estimating process without adding more headcount.

— Improved speed and confidence across the bidding workflow.

“For companies of my size that are looking to grow, Beam AI is a great alternative to hiring an in-house estimator.”
