

When to seek help with your fertility?

Wondering when to see a fertility specialist?
Is it after 6 months or a year of trying?

The answer is now

There is no reason to wait. Book a consultation with us to explore your options, get helpful information, and undergo fertility testing.

Same-day testing

We offer same-day diagnostic tests for men and women. Our dedicated team will work closely with you to craft an individualized treatment plan with the best chance of success. We are a one stop destination for fertility care.

Our expert care team

We provide compassionate and streamlined care. As part of our patient-first approach, we will guide you on your fertility journey.

We partner with reproductive psychologists, genetic counselors, nutritionists, acupuncturists, and legal services to ensure personalized support.

Our providers

Dr. Thalia Segal

Sacramento
2277 Fair Oaks Blvd, Suite 250,
Sacramento, CA 95825

Dr. Segal is just the best. I've always wanted to become a mother and we are now 7 months pregnant and I couldn't be happier. If you're unsure where to go please check out Collab. You won't be disappointed. Thank you Collab team!

Susy

My husband and I are absolutely blown away by Collab Fertility and Dr. Segal! From our first meeting with Dr. Segal I was immediately struck by her compassion, clear expertise, absolute kindness, and exceptional communication.

Lissa & Justin

Your path to parenthood

We are passionate about helping people grow their families. Our services include:

- Same-day fertility testing
- Genetic carrier screening to make sure you and your partner don't carry the same condition (i.e. cystic fibrosis or Tay Sachs)
- Fertility preservation, including egg and embryo freezing
- In-vitro fertilization (IVF)
- Preimplantation genetic testing of embryos
- Intrauterine insemination (IUI)
- Sperm extraction and aspiration followed by freezing and/or IUI and IVF with a partner
- Assistance securing donor sperm, donor eggs, and gestational carriers
- Comprehensive genetic counseling
- Recurrent pregnancy loss workup

Imagine your future with us

Experience a collaborative and evidence-based approach to fertility care, tailored to your individual journey.

Collab Fertility exceeds success rates at every age group

IVF success rates are closely tied to age, with pregnancy rates declining significantly after age 38. The chart below compares Collab Fertility's ongoing pregnancy rates to national averages across age groups, highlighting the importance of early evaluation and individualized care.

Dr. Segal's reassurance — your body can do this, you're on the right track — meant everything. She would take time to look at the data with me, which is something that I really appreciated.

Our commitment to world-class lab technology

We invest in state-of-the-art equipment to ensure the safety and stability of eggs, sperm, and embryos.

- LifeAire system®
- 24/7 security cameras
- Temperature and equipment alarms
- Dedicated backup generator

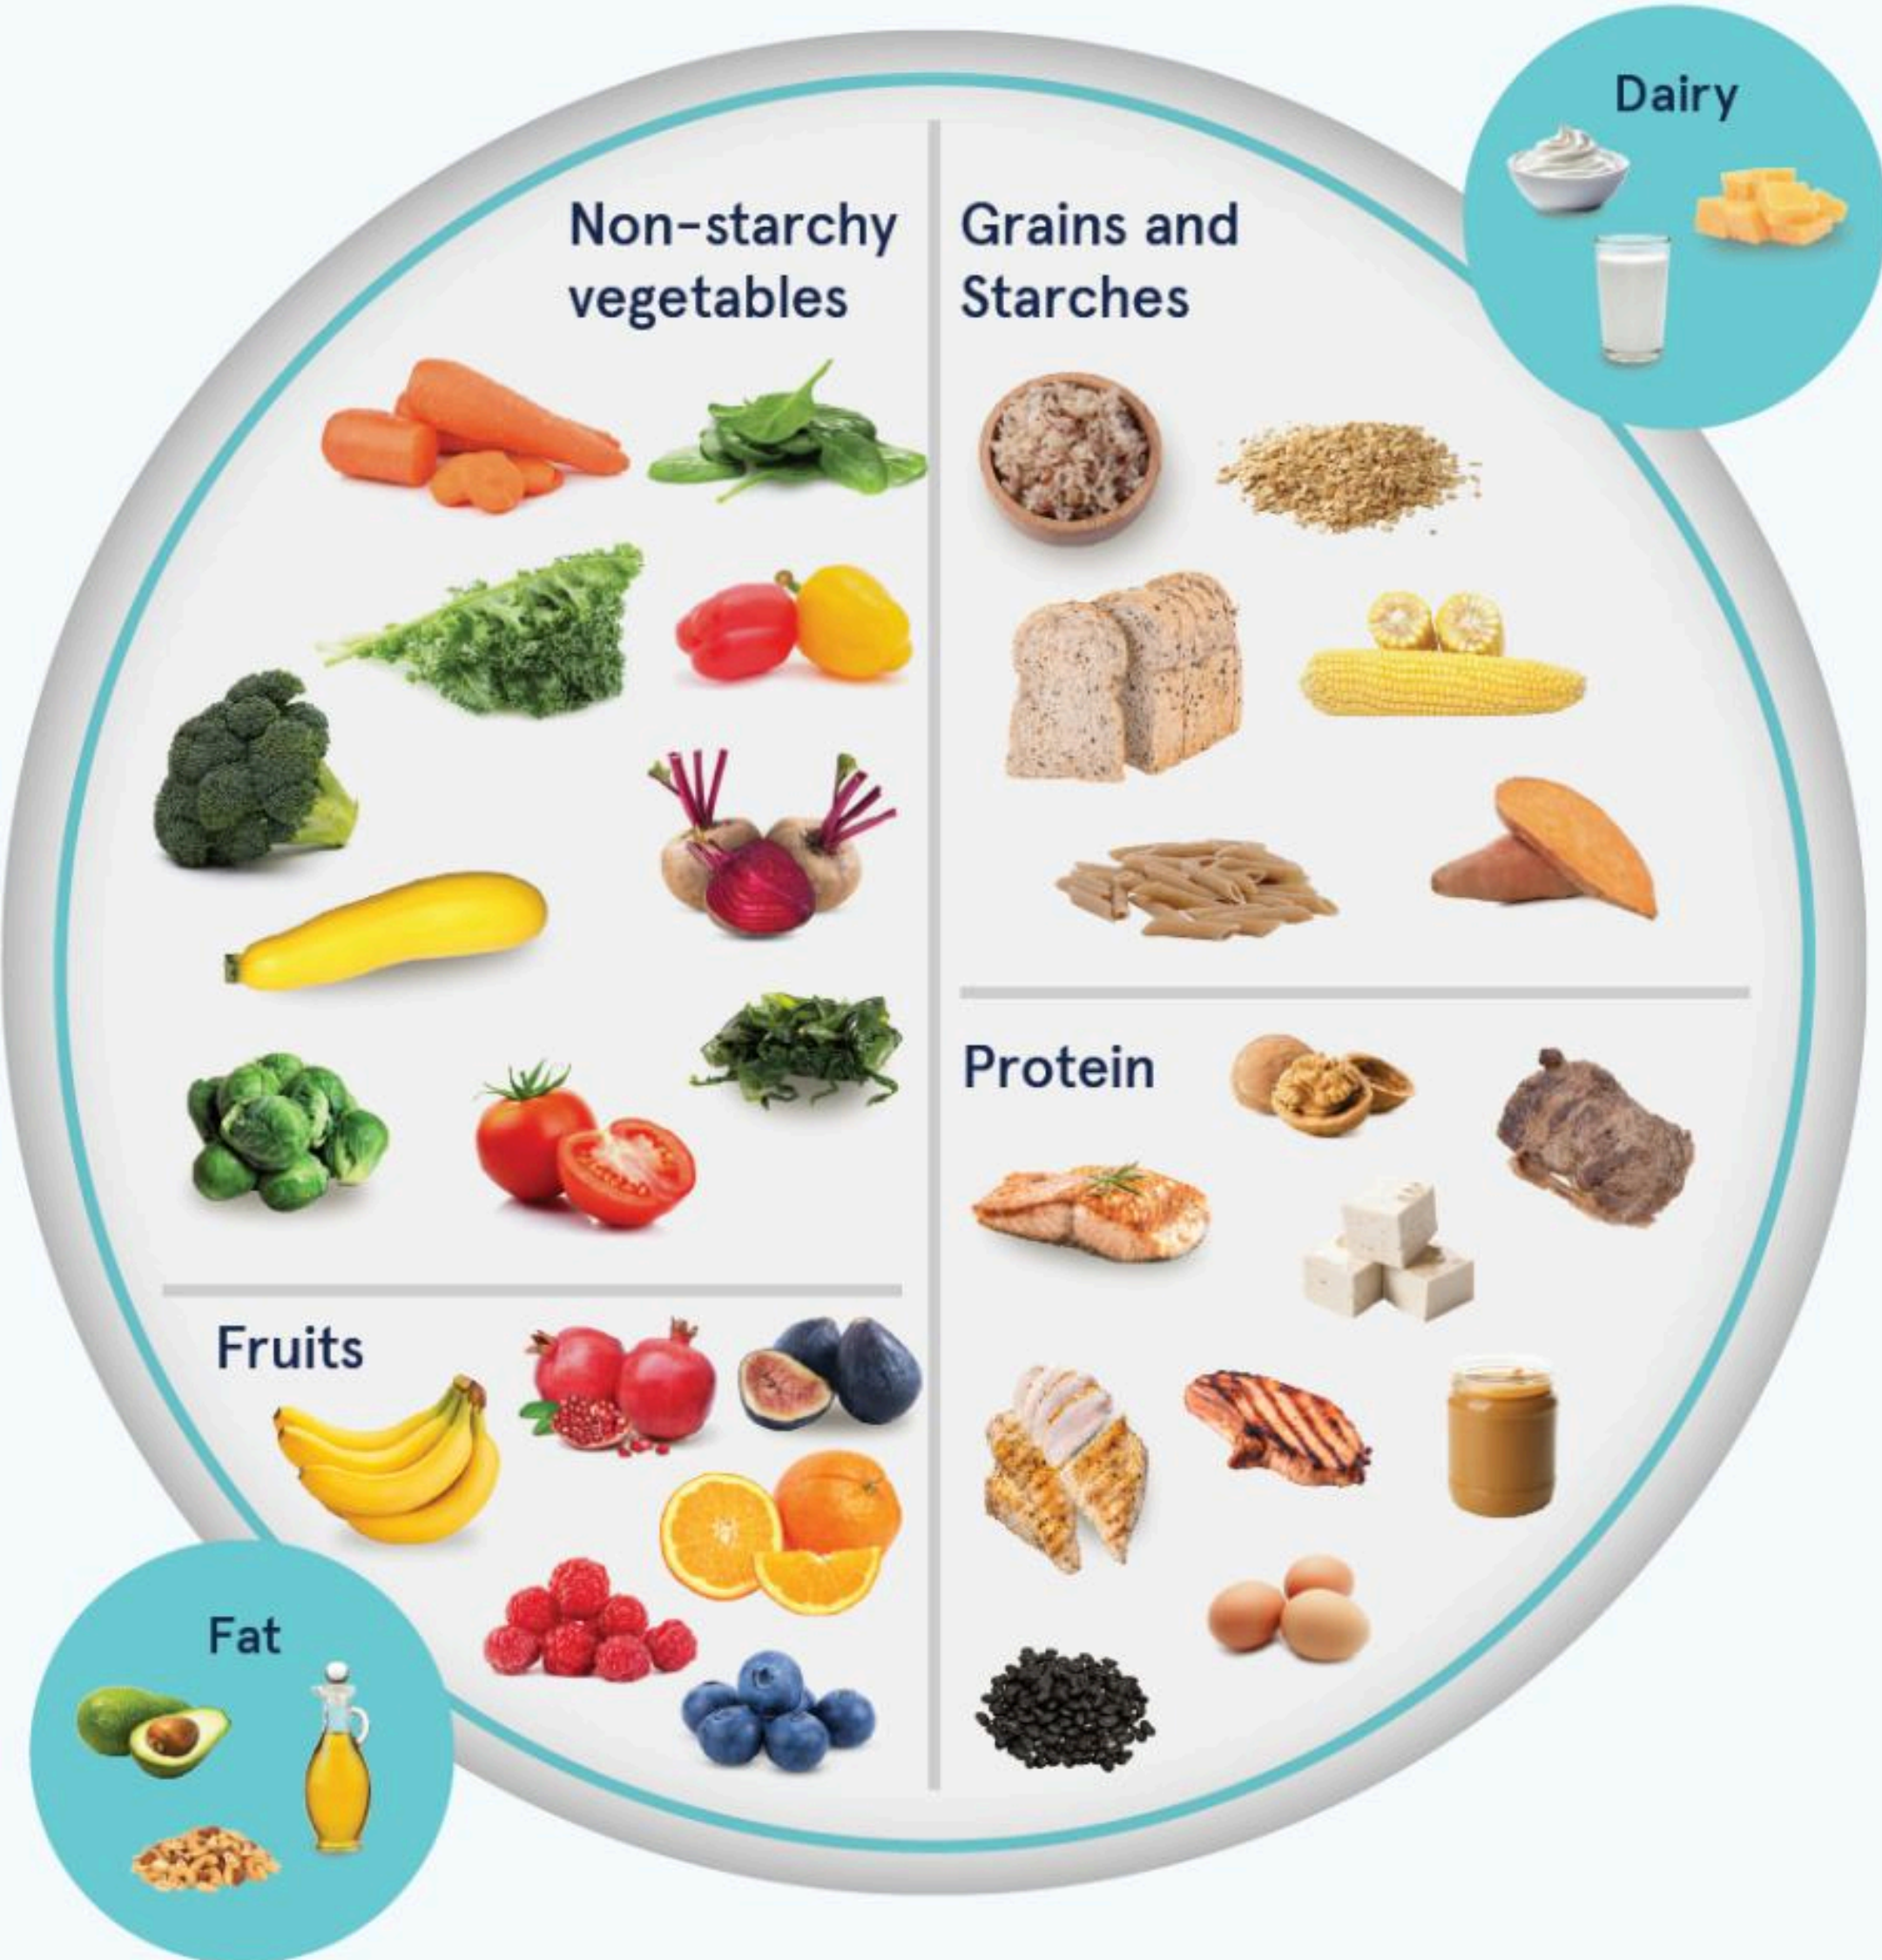

Our embryologists are highly skilled and precise scientists. Their greatest reward is helping you build your family.

CLEAN researches the impact of environmental toxic chemicals, lifestyle, and nutrition on reproductive health. By advancing science, education, and policy change, we improve fertility outcomes for patients and future generations.

We're here to support you with THE COLLAB WAY

- Personalized nutrition guidance.
- Clean living education.
- Integrative care approach.
- Referrals to acupuncture and therapists.

What to expect at your first consult

- 1 Medical history & discussion**
 - Review medical history
 - Discuss fertility testing & treatment options
 - Environmental toxic chemical assessment
- 2 Pelvic ultrasound**
 - Antral follicle count
 - Check for abnormalities e.g. ovarian cysts, endometriosis, fibroids, polyps, hydrosalpinges
- 3 Coordinator & financial counselor meeting**
 - Discuss next steps, costs, & financing options

Affordable fertility treatment

We work to make fertility care more accessible, with insurance partnerships, financing options and financial assistance programs for eligible patients.

For patients facing cancer, additional support may be available:

Through our partnership with The Chick Mission, eligible patients can receive fertility preservation treatment at Collab Fertility at no cost before cancer treatment begins.

Through Livestrong Fertility, eligible patients can receive fertility medications at no cost.

*We also offer a 10% discount to Kaiser patients, first responders, teachers and military families.
