

Trust Nothing. Verify Everything.

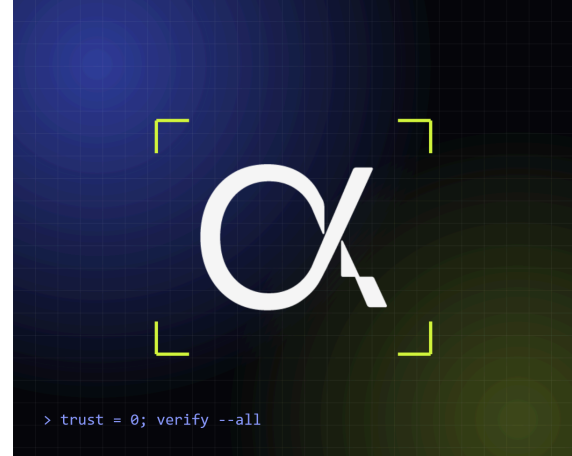

Five posters for offices and homes: one for each campaign week, and one for the fridge.

What's inside

#	Poster	Where
[01]	That urgent email? Don't trust it.	Office · Week 1
[02]	Your password is not enough.	Office · Week 2
[03]	That voice might not be your boss.	Office · Week 3
[04]	Trust your backups. Test them first.	Office · Week 4
[HOME]	Trust nothing. Verify everything.	Home · fridge

Printing tips

- **A4** prints on any office printer. For **A3**, scale the page to 141% or ask a print shop.
- The posters are dark, so a **laser printer** or a print shop gives the best result.
- Write your own contact on the **"Report it to"** line before you put a poster up.
- Pages 2–6 are the posters, so print only the pages you need.

How to use the posters

- Put them where decisions happen: **next to the printer, in finance, by the coffee machine.**
- **Swap the poster every week** to match the campaign theme.
- Write your own contact on the **"Report it to"** line.
- The web address on every poster leads to **all the free guides.**
- Poster 5 is for home. Send it to your team to print for their families.

Why Alphatechs

24/7 security operations with a 30-minute response, penetration testing, and Sphere TI, our own threat intelligence platform.

Take the Next Step

How ready is your business? Free SME Cyber Readiness Checklist:

- UNVERIFIED

That urgent email? Don't trust it.

Perfect grammar. Real logo. Still fake.

- ✗ You weren't expecting it
- ✗ There's a deadline or a threat
- ✗ It asks for a password, a code or a payment

- **VERIFIED:** open the app or type the address yourself.

Not sure? Report it to: _____

Trust Nothing. **Verify Everything.**

- UNVERIFIED

Your password is not enough.

MFA blocks more than 99% of account takeovers.

- ✓ MFA on email, VPN and every admin account
- ✓ Never approve a login you didn't start
- ✓ Never share a code. Not with anyone.

- **VERIFIED:** password + your phone or a passkey.

Unexpected login prompt? Report it to: _____

Trust Nothing. **Verify Everything.**

• UNVERIFIED

That voice might not be your boss.

Voices, faces and video calls can be faked with AI.

- ✓ Money or data request? **Call back on a number you already know.**
- ✓ New bank details? Verify before you pay.
- ✓ No exceptions for "urgent" or "confidential"

- **VERIFIED:** confirmed on a channel you already trust.

Something feels off? Report it to: _____

Trust Nothing. **Verify Everything.**

• VERIFIED

Trust your backups. Test them first.

The boring habits that beat ransomware.

01 Click **“Restart to update”**, not “Remind me tomorrow”

02 **3-2-1 backups**: 3 copies, 2 places, 1 offline

03 **Report** anything strange, right away

• **VERIFIED**: a backup you've actually restored.

Report it to: _____

Trust Nothing. **Verify Everything.**

Trust nothing. Verify everything.

01 We have a **safe word**. No word, no money.

02 We **never share codes**, with anyone

03 **MFA is on** for email, bank and WhatsApp

04 We **call back** before we click or pay

05 **Updates on**, always

Our safe word is known only to us. Never write it here.

Trust Nothing. **Verify Everything.**
