

Founded in 1961, Florida Preparatory Academy began its prestigious academic legacy as Florida Air Academy, helping hundreds of alumni pursue careers in aviation-related industries.

Since then, the school has gone on to become a beacon of academic excellence, expanding from only offering aviation-specific education into a school providing students with a wide range of academic courses and opportunities.

Located on Florida's Space Coast – home to NASA and one of the nation's fastest-growing technological communities – Florida Prep offers students a rigorous STEAM-focused curriculum, a Dual Enrollment program with local colleges and the resources students need to excel as global citizens.

Florida Prep has an incomparable reputation as a preeminent secondary school with a large global footprint, welcoming students from around the world.

The Unique Flight Training Program Helps Students Spread Their Wings And Take To The Skies

The flight training program is one of the most distinguished traditions at Florida Prep, beginning at its founding in 1961.

Hundreds of alumni have gone on to achieve incredible things in the aviation industry, including earning their pilots' licenses, gaining leadership roles within the industry and becoming pilots for major airlines, including United, America, Delta and more.

A partnership with Florida Institute of Technology Aviation and an on-campus RedBird simulator are available to students at Florida Prep. Students have the added bonus of generous and enthusiastic support from alumni, through which they can network and make connections that will benefit them greatly in the future.

Students are prepared for careers in a wide range of aviation industries including Aeronautical Science, Aeronautics, Aerospace Engineering, Aerospace Physiology and Air Traffic Management.

Niche Location Provides Students With Unique Learning Opportunities

Florida Prep's campus is located on Florida's Space Coast – so named because it's also the home of the Kennedy Space Center and NASA headquarters. Numerous engineering and private sector firms that collaborate with NASA are located within walking distance of the campus. The school's proximity to Orlando also offers unparalleled opportunities for advanced learning, internships, career prospects and entertainment.

Students can enjoy Florida's year-round warm weather and sunshine on a campus just down the road from the beach!

Dual Enrollment: A Cost-Effective Pathway To Academic And Professional Success

At Florida Prep, qualified students can earn college credit at Eastern Florida State College and the Florida Institute of Technology (FIT), with access to state-of-the-art classrooms, research opportunities and laboratories.

Credited enrollment is available for studies in aeronautics, aviation, engineering, computing, higher-order mathematics and liberal arts and humanities.

Students who earn 24 credit hours may be eligible to enter university as a sophomore or graduate with an associate's degree, which equates to saving up to \$40,000 upon transfer to a four-year university.

Any Florida Prep student who completes six or more credits at FIT with a 3.0 overall GPA is guaranteed admission to FIT upon completion of the undergraduate admissions process.

Well-Rounded Academic Support And A Comprehensive Boarding Experience At An Affordable Price Point

Florida Prep offers an immersive and distinguished ESOL (English for Speakers of Other Languages) program for international students. With personalized learning plans, ESOL students are immersed in regular and structured interactions with native speakers on campus and in the local community.

The residential dorms are located in a historic building at the heart of campus. At least two members of the residential staff are present 24 hours a day, seven days a week to assist with all aspects of boarding life.

Events are planned every weekend on and off campus, including trips to nearby college campuses, Orlando malls, theme parks and other attractions.

Scholarships are offered and qualified students could be awarded up to \$10,000.
