

 **Kinetic-ID**
Optimising Your Workflow

Trusted by teams who can't afford downtime

When Life Sciences teams can't access data where the work happens, everything slows down from batches, reviews, audits and even decisions on the floor.

Whether it's MES, LIMS, SCADA or environmental monitoring, the moment operators have to leave their area of work to check a system, you introduce delay, distraction, and risk.

Kinetic-ID exists to eliminate that gap.

We design mobile and fixed HMI systems that put real-time data exactly where it's needed - at the point of work, not a room away.

Every product in our ID-Flow series is purpose-built for cleanroom, packaging, and QA teams who need secure, 24/7 access to digital systems without breaking compliance, losing uptime, or cutting corners.

If your job depends on staying compliant, connected, and in control, this is the infrastructure that lets you do it, without any bottlenecks.

ID-Flow 1

The entry-point for light industrial mobility

WHY CHOOSE THIS?

Simple, lightweight, and cost-effective mobile access for non-cGMP environments.

ID-Flow 3

Smart mobile cart for labs, packaging, and cGMP areas

WHY CHOOSE THIS?

Integrate MES, LIMS, DCS or label printing into the flow of daily work with no IT bottlenecks.

ID-Flow 5

Stainless steel cart built for Grade C or D environments

WHY CHOOSE THIS?

Durable, validated-ready design with clean power and round-the-clock uptime.

ID-Flow 6

Grade B or C, hygiene-first cart with full stainless integration

WHY CHOOSE THIS?

Built for facilities where stainless steel compliance is non-negotiable.

ID-Flow 9

Highest-grade cleanroom cart for Grade B and critical zones

WHY CHOOSE THIS?

Work seamlessly across systems (MES, SAP, LIMS, DCS) without compromising cleanroom compliance.

ID-View

Wall or floor-mounted HMI for fixed, cleanroom-ready access

WHY CHOOSE THIS?

When your workflows demand fixed access to MES, LIMS without compromising hygiene or flexibility.

"Our Associates reported an average of 9% time saving across their daily activities when using a Kinetic-ID mobile workstation. We certainly see the benefits in being mobile in our operations."

- Large Bio-Pharmaceutical Customer

Our infrastructure is built for your reality! Secure DC power, low energy use, support for your existing IT estate, and the flexibility to match your workflows. Not the other way around.

Reduce risk, boost efficiency, and see ROI faster with HMI solutions your IT can adapt for the future
