

Moose Jaw Panel

Close Access, Portable fastening power

The Panel-Lock uses Press Lock's hydro-pneumatic tech in a compact, lightweight design for easy, modular metal joining. With zero setup, operators can dive into projects worry-free.

Moose Jaw Panel with Booster Unit & Optional Spring Balancer

No additional compressor capacity needed

Our systems use 30% less air than most clinchers. This allows you to add a machine without upgrading your compressor capacity.

No-leak hydraulic swivel

The 90° hydraulic connector swivels and prevents breakdowns and leaks.

Robot-ready

Add the MooseJaw to any robotic arm for fully automated clinching operations.

Clinch wide or hard-to-reach parts

The wide opening allows you to clinch challenging parts that other machines may not be able to reach.
