

# Fried Chicken & Champagne

## A Match Made in Heaven

The bubbles in Champagne cut through the richness of fried chicken by effectively breaking through the fats on your palate. Bonus: in these wines the winemaking process results in expended yeast cells which help aid digestion — it was the only thing Marilyn Monroe drank — practically good for you!

**GO BIG OR GO HOME**  
We have the Biggest Champagne list in America. Ask your sommelier for the sacred scrolls!

### CHAMPAGNE

|                                                                                                                |            |                                                                                              |            |
|----------------------------------------------------------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------|------------|
