We (FirePro UK Ltd) advised you (Insert Person and Company Name) 'the client' FirePro fire suppression Product is provided to suppress fire and is **not designed or warranted** to preserve the functionality, integrity, or recoverability of Sensitive Equipment, (including, but not limited to, information technology-related equipment and interconnected systems and subsystems used to store, process and manage data, electronics, hereafter referred to as "Sensitive Equipment"),

We provided you a draft fire strategy suggesting you employ very early fire detection aspirating technology to support prompt first-aid firefighting intervention, thereby reducing the likelihood of an unnecessary FirePro system discharge. The strategy at the exhaustion of all the intervention stages that the FirePro agent is manually deployed to suppress a fire, as a final response measure.

FirePro UK Ltd does **not** recommend or endorse the installation or use of its products in any environment containing Sensitive Equipment, whether on a temporary or permanent basis. If the Client elects to install the FirePro Product in proximity to any Sensitive Equipment, the Client acknowledges that any discharge (for any reason) of the FirePro agent will function as a fire-suppression action but may nonetheless cause **permanent and irreparable damage** to any Sensitive Equipment exposed to the agent during or at any time after discharge.

Similarly, where the protected environment contains a diesel generator or other plant reliant on combustion air intake (hereafter referred to as "Combustion Plant"), FirePro UK Ltd does **not** recommend or endorse the installation or use of its products in any environment containing Combustion Plant unless the Client has implemented a documented shutdown procedure, whether automatic or manual, to secure the Combustion Plant prior to, or immediately upon, activation of the FirePro Product. If the Client elects to install the FirePro Product in such an environment, the Client acknowledges that any discharge (for any reason) of the FirePro agent will function as a fire-suppression action but may nonetheless result in the agent's particulate being drawn into the Combustion Plant's air intake, causing **permanent and irreparable damage** to the Combustion Plant, where it has not been shut down prior to or upon discharge.

FirePro UK accepts no liability in respect of any adaptation made, following the issuing of its terms, to facilities in which its products are to be stored, discharged or otherwise located. You agree to indemnify us and keep us indemnified against and hold us harmless in respect of all liabilities, claims, damages, losses (including, without limitation, loss of profits, loss of business, loss of reputation, loss of savings and loss of opportunity), fines, expenses and costs (including, without limitation, all interest, penalties, legal and professional costs and expenses calculated on a full indemnity basis) incurred as a result of or in connection with exposure to the FirePro agent by you and/or any third party whether directly or indirectly.
