PACIFIC LUBRICATION CONSULTANTS

COMPANY OVERVIEW

FOOD SAFETY. RELIABILITY. GMP.

YOUR TRUSTED LUBRICATION SERVICES PARTNER SINCE 1994.

Welcome to **PACIFIC LUBRICATION CONSULTANTS.**

The Lubricant Specialists for the Food and Beverage Industry in Australia.

At Pacific Lubrication Consultants, service and support are our priority. We are industry leaders in the supply of H1 food grade lubricants & audit proof programs to the food and beverage sector.

We pride ourselves on outstanding service, lubrication solutions, training and high quality equipment to support our extensive range of CARGO Oil lubricants, a world leader in food grade lubrication products.

OUR COMPANY APPROACH FOCUSES ON:

FOOD SAFETY

We provide high quality food grade lubricants suited to your business needs.

RELIABILITY

Dependable performance, efficient operation, extended uptime.

GMP

We help your business stay on top with the latest in Good Manufacturing Practices.

**Australia's largest food and beverage companies
utilise Pacific Lubrication Consultants
to supply CARGO oil, grease and
aerosol lubricants.**

OUR PRODUCT RANGE

Lubricants

We are the Australian distributors of *CARGO Oil* H1 Food-grade oils, greases and aerosols.

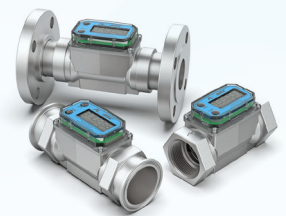

CARGO oils and greases are premium H1 accredited food grade lubricants. Unlike other lubrication companies, CARGO have a complete food grade product division consisting of product development, manufacturing, blending, food safety and compliance.

CARGO has developed many of the most technically advanced oils, greases and aerosols in the world, from our high performing PAO gear oil, market leading Caxtreme grease to the ultimate all-rounder aerosol Synlube w/PTFE. Our food grade aerosol range is one of the largest available in Australia.

Our FG aerosol range is one of the largest available and features our food industry specific 2-way actuator button and built-in straw. This almost eliminates the possibility of a mechanical contamination incident.

Flow meters

We offer a comprehensive range of flow meters, including *Oval Gear*, *Turbine* and *Magnetic*. We can meet your needs with high-end rate totalisers, batch controllers, communication modules and hazardous area displays. We design batching systems for all your production needs.

Lubrication equipment

We provide a wide range of lubrication equipment, including oil and grease pumps, grease guns, colour coded storage and automatic lubrication systems.

Head to our website to check out our full range of
CARGO Oil food grade lubricants at www.pacificlubrication.com.au

OUR LUBESAFE® PROGRAM

LUBESAFE® is a complete audit proof Food Safety Lubrication Program developed to eliminate all possible lubrication risks in the production of food and beverages. It gives you a HACCP compliant system for your maintenance program.

The program covers 5 key elements:

1. H1 food grade lubricants

Utilising *CARGO Oil* high performance food grade lubricants.

2. 5s Lubrication store

Free design, quote and setup of industry leading lubrication stores when taking on the LUBESAFE® program.

3. Lubricant ID and visual aids

Creating a simple pathway from the oil store to your asset.

4. Documentation, compliance and audit management

Our program has been endorsed by the major grocery chains, ensuring your site will pass any audit.

5. Personnel training

We specialise in lubrication, technical, safety and compliance training carried out by a qualified trainer.

For more information about LUBESAFE® contact our expert team on 1300 733 929.
