

WILD DOG PROGRAMME WISHLIST 2025

THANK YOU FOR YOUR SUPPORT!

WHAT IT TAKES...

AFRICAN WILD DOG CONSERVATION PROGRAMME

The African Wild Dog is the second most endangered carnivore in Africa. They are a canid that lives throughout Africa from heavily forested areas to open plains. In South Africa, there are fewer than 650 individuals remaining in the wild. Their IUCN Red List of Threatened Species Status is Critically Endangered.

Due to their endangered status, African Wild Dogs are one of Wildlife ACT's focal species, which with conservation efforts being focused on their success. Our intensive monitoring of African Wild Dogs is done 365 days a year. Our ultimate goal is to reintroduce these iconic animals successfully back into their historical ranges and ensure the protection of the population into the future.

Our wishlists for effective management of this Programme:

- **Corporate collaborations and sponsorships on all scales**
The provision of essential discretionary financial support and resources to maximise impact.
- **Basic VHF tracking collar (3yr+ battery life) - R11,400**
Will enable monitors to track individuals in the field using telemetry.
- **VHF tracking collar with Telonics (3yr battery life) - R18 550**
Will enable monitors to track individuals in the field using telemetry.
- **LoRa & AFDVHF GPS tracking collar - R18 000 (Annual LoRa and portal fees - R692.66)**
Will better enable monitors to track individuals both in and outside Protected Areas.
- **SAT & AFDVHF GPS tracking collar - R26 685 (Annual satellite and portal fees - R8152.34)**
Will best enable monitors to track individuals both in and outside Protected Areas.
- **Veterinary Fee - R8000**
Will cover the fee of a wildlife specialist vet for the day.

THANK YOU
