

Protecting Your Most Essential Leaders

In today's complex threat environment, ensuring the safety of executive leaders is not only a duty of care—it's a strategic business imperative. Corporate Security Advisors (CSA) partners with organizations to design, evaluate, and elevate executive security programs that protect against physical, digital, and reputational threats—while aligning with business culture, risk tolerance, and IRS compliance requirements.

A Strategic, Business-Aligned Approach to Executive Security

CSA's Executive Security services are built for the boardroom, not just the field. Our engagements balance discretion with rigor, blending decades of public and private sector experience to deliver risk-based security strategies that inspire confidence at the highest levels of leadership.

We help organizations:

- Evaluate existing executive protection measures
- Develop IRS Section 132-compliant programs
- Mitigate emerging threat vectors, including digital exposure
- Secure executive travel, residences, and workspaces
- Align executive protection with corporate risk governance

Our Core Executive Security Services

- **Executive Security Program Review (ESPR):** Top-down evaluation of the executive security function, including governance, policies, resourcing, and coordination. Benchmarked against peer organizations with clear, actionable recommendations for program maturity.
- **Executive Risk Assessment (ERA):** Individualized risk profiles for key executives analyzing public exposure, threat intelligence, travel patterns, and workplace vulnerabilities. Designed to identify and prioritize risks (both physical and digital) with minimal disruption to executive workflow.
- **IRS 132-Compliant Independent Security Study (ISS):** Comprehensive, defensible assessments documenting the business rationale for executive protection services and enabling tax-exempt treatment under IRS guidelines.
- **Program Development & Implementation:** End-to-end support to stand up or transform an Executive Security Program, including SOPs, residential and travel protocols, workspace enhancements, and contingency planning.

Why Choose CSA

Executive protection is a deeply personal, highly visible function that must operate at the intersection of discretion, risk intelligence, and business credibility. That's why leading organizations—from Fortune 100 companies to privately held enterprises—turn to CSA. Our team includes former Chief Security Officers, senior federal officials, and protective intelligence experts who have designed, led, and matured Executive Security Programs across industries and continents. This includes global protection operations for Fortune 50 CEOs, oversight of high-risk executive movements, and governance for publicly traded boards.

- **Unmatched Experience at the Highest Levels**

CSA's team includes former Secret Service leaders, Fortune 100 CSOs, and federal security executives. We've supported some of the world's most prominent organizations and individuals.

- **Proven, Scalable Methodology**

Our two-tiered approach—starting with an ERA and ESPRs, then scaling to an ISS as needed—ensures fiscal efficiency while maintaining rigorous risk coverage.

- **Trusted After Crisis, Valued in Transition**

Whether responding to high-profile incidents or supporting leadership changes, CSA operates with discretion, speed, and credibility when it matters most.

- **Boardroom-Caliber Deliverables**

Our work product is tailored for executive and board-level audiences—clear, defensible, and aligned to corporate strategy.

A Client Success Story:

Strengthening Executive Security Posture Following Industry Crisis

Following the targeted killing of a healthcare CEO, a Fortune 500 client engaged CSA to assess risk across its executive committee. Our hybrid approach—combining a series of individualized Executive Risk Assessments, Independent Security Studies for higher-risk leaders, and a comprehensive program review—delivered actionable recommendations, elevated internal credibility, and avoided unnecessary cost. Today, the organization is implementing enhanced protocols for travel, events, residential security, and executive engagement.
