Data Backup & Disaster Recovery	it-services	Software	20%	Licensing for all Infrascale appliances, either physical or virtual, is based on the net capacity of the appliance you have purchased. The net capacity of each appliance is the total raw capacity minus the capacity allocations needed for standard RAID 5 configurations and archiving. For example, the license for 2.4 TB is derived from 3.2 TB of raw capacity minus 400 GB for RAID 5, and minus 400 GB for archiving.
