

Inventory Tool Preview

Real-Time Tracking
That Sells Cars Faster

Overview Section:

Stop losing deals to outdated inventory lists.

Epoch's Inventory Automation Tool **keeps your sales team informed with live updates**, so when a **lead calls** about a vehicle, you know it's **available right now**.

Why Inventory Visibility Matters

-  68% of buyers expect accurate inventory online before they call or visit.
-  Missed updates = lost leads and frustrated sales staff.
-  Manual updates waste time and create errors.

See It In Action

Imagine opening one dashboard and instantly **seeing** your **entire inventory status**: vehicles in stock, pending deals, and sold units: all color-coded **for quick scanning**.

With **Epoch's intuitive layout**,

-  Your sales **team can filter** by make, model, or status in seconds and instantly know which **vehicles are available to sell today**.
-  This **eliminates guesswork, double-booking**, and makes it **easy for managers** to **spot bottlenecks!**

Key Features

Real-Time Updates:

Syncs across CRM, sales floor, and website automatically.

Smart Routing:

Sends leads directly to the right salesperson based on availability.

Mobile-Friendly Access:

View and update stock from any device.

Alerts & Notifications: Get notified when a vehicle is sold or arrives in stock.
