with engineering-level thinking
and leadership skills

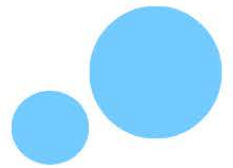

CAREER LADDER

A structured path from skilled
technician to confident shop-
floor leader

REAL-WORLD IMPACT

Apply learning directly to your
workplace from day one of the
program

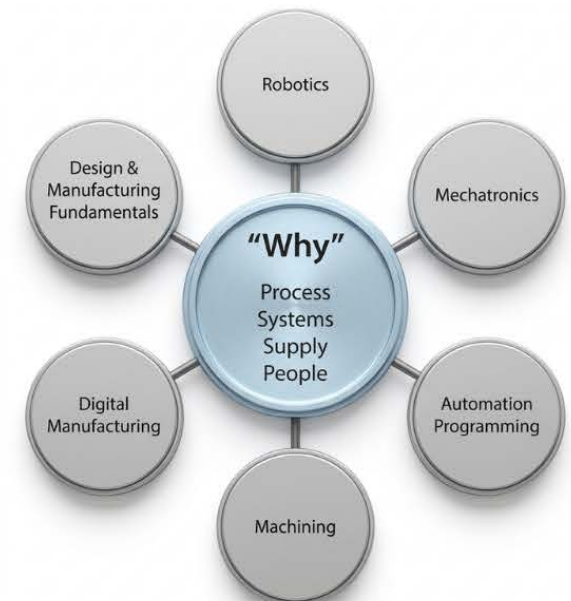

About

**Ready to advance your
workforce in just one year?**

TechAMP is a 12-month program
designed by the MIT Leap Group
for experienced individuals who
are ready to step into shop-floor
leading.

With online modules led by MIT
faculty, and in-person labs
taught at regional education
sites, students link critical
thinking why to cutting-edge
how.

Current Students & Employers Say:

"I want hands on. I want something that I can be more involved with, and this [TechAMP] has really shown me so many different opportunities of what I could do in the future." - **Nicole, Proterial**

"We're looking at completely changing how we hire for some of our basic operating positions. The program has opened our eyes up to management philosophy and the way to look at something more holistically."

- **Mike Trotta, Crystal Engineering**
